

How to Download an App—Mosyle Manager

Mosyle Manager is our "WFPS App Store". This manager app will allow students and teachers the ability to download apps to their device. The apps in the Mosyle Manager app are ones that have been approved by the Curriculum and Instruction team for middle level learners.

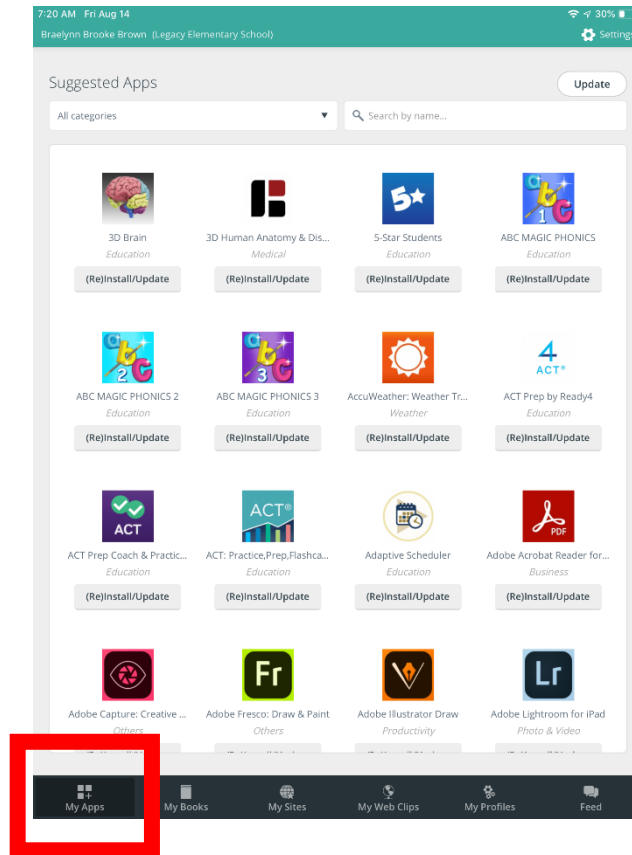

Students, please don't download everything in there. Think of it as a choice board. Choose the ones you need or want to try out but leave the rest in there. There is limited space on your iPads and we don't want to fill it up with unused apps.

To download an app:

1. Open *Mosyle*

2. In the bottom task bar, select *My Apps*.

3. In the *Search box*, type the name of the desired app, click on it, and it will download to the device.
