

SCHOOL CALENDAR

School will be in session for at least 180 days but less than 190 days each year, as required by state law.

Annually, the School Committee will adopt a calendar for the coming school year. The superintendent will be responsible for preparing a proposed calendar for the Committee's deliberations.

The school calendar will include all holidays and vacations periods, the starting and ending dates—including possible make-up days for school closings during the year—and any inservice or teacher institute days.

In preparing the calendar, the superintendent will consult with other area superintendents, the administrative staff, and the employee negotiating units. However, adoption of the official school calendar is solely the right and responsibility of the School Committee. Any variations in the calendar during the year will also require Committee approval.
