Music

5th Grade Spring Concert

May 29, 2024

6pm in the Malcolm Gym

Students should arrive by 5:45pm.

Computers

We have been busy in the computer lab and the atlas. We have learned about parts of the computers and typing. We have been doing move this world and we have done a book fair. Students have also been writing during class.

PE

It is hard to believe that we are quickly approaching the end of the school year! Our final skill of the year is foot skills with the sport of soccer. We will start traveling outdoors for the intermediate grades by the end of the week. Please let me know of any allergy concerns as we start to move class outside. It is recommended that students bring water bottles.

Field Day has been set to Friday, May 31st! The students voted on their theme for this year's special event. The winner with the top votes was "Disney". Please be on a lookout for a sign-up genius to assist with supplies for the students to make this an amazing event for all!

Art

Greetings Families! I hope that April has treated you all well. As we are now moving into the last 2 months of school, students in grades pre-k to 5th will continue learning about the elements of art, how to apply them to real life art concepts/projects, and more. Students in 1st to 5th grade are still working on sketchbook prompts on a daily basis and will continue working on art projects regarding the element of art "Shape", continuously learning about organic and geometric shapes throughout the process. Please don't hesitate to contact me if you have any comments, questions, or concerns. I can be reached via email @drhodes@ccboe.com or talking points. Have a phenomenal day.

Science

As we move into May, our science classes will be continuing 4th quarter work. 2nd grade will be looking at different life cycles, including plants. Please be on the lookout for a special gift. 3rd grade will be starting their Meaningful Watershed Experience, learning about how our actions can positively and negatively affect the environment. 4th grade will be continuing to look at the structure and function of animal and plant parts. 5th grade will continue their unit about space, ending with a research project on a planet and launching bottle rockets.

Library

We have been really busy in the library. We just had a fantastic book fair and a lot of great books were sold. We are also looking at nonfiction and reference with our students too. Next week May 13th through 17th is the last week for checkout. Make sure you get your books back!
