North Community HS Site Council Notes – Facilities & CTE

Our Site Council is committed to full loyalty to, and representation of, our students, staff, parents, alumni, neighbors and community. As advisees to our Principal and loyalty to our stakeholders, we put forward the following Givens and Asks.

Our Givens:

- Our Facility has been neglected and is sub-par in comparison to what other high school students experience in and around MPS and what we believe our children are deserving of.
- Our Site Council endorsed a CTE model that touted investment into our current CTE programming – Computer Science/Technology & Radio/Broadcasting.
- Our Site Council was not aware of, and does not endorse, a separate, conjoined building with its own identity (name, entrance, administrator, etc).

Our Asks:

- A fully invested in upgrade that does not displace during remodel.
- The ceasing of this secondhand, second class physical structure and scattered repair.
- Commitment to our CTE that keeps our programming a part of our North High identity.
- A state-of-the-art facility for our students to attend, teachers to teach in, and our parents, alumni and community members to be present in.
- An allowance of alumni and local community to financially invest and leave legacy marks.
- Transparency and authentic engagement with surrounding community.
- A consideration of one of the original designs as the exterior:
