

COMMUNITYSHARE

CommunityShare is a nonprofit that weaves learning ecosystems that activate student engagement, career readiness, and belonging through community-engaged, real-world learning experiences.

“ Thanks to CommunityShare, students who have struggled all year to complete lesson projects were engaged, creative, and thinking about how to solve problems in their community.”
- CommunityShare Educator

Catalyzing student and community engagement

Student disengagement and retention are some of the biggest challenges facing education today. Real-world learning and community connections increase student engagement, academic achievement, career/college readiness, health, and economic mobility.

Our digital platform provides a “one-stop shop” that makes it quick and easy to find and connect with community partners.

We partner with school districts/networks, nonprofits, coalitions, and municipalities to grow regional learning ecosystems that connect STEM professionals, artists, entrepreneurs, parents, and other community members with educators and students through real-world learning experiences.

Our Impact

- 98%** increase in student engagement and socio-emotional skills
- 96%** of students developed critical thinking, problem solving, and collaboration skills
- 87%** increase in student career and college readiness

Tools to ignite student agency, engage educators, and increase retention

Digital Matching Platform

Connecting educators with community partners with relevant experience

Capacity Building

Implementation coaching, workshops and educator communities of practice

Digital Data Dashboard

Access real-time impact data on students, educators, and community

One-on-one Support

Our team provides technical support and guidance

“ I used to think that engineering, science, and research were for smart people. Then I discovered that I’m “smart people.”
- Lexana, High School Student

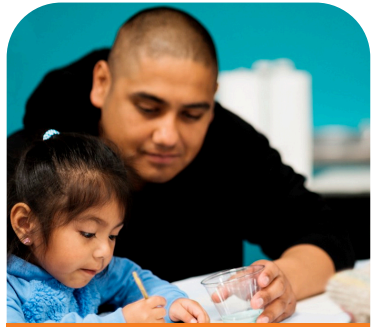

“ My students were very motivated by their CommunityShare project in ways that improved reading and academic achievement. At the start of the school year 12% of my students were performing above grade level, by the end 94% were performing above grade level.”
- Mercedes Pemberton-Negrete
Sunnyside Unified School District

Strategies tailored to your community

Your community has its own history, strengths, challenges, and aspirations. CommunityShare partners with you to develop a customized implementation plan that meets your unique priorities, whether it is career readiness, STEAM, experiential learning, or community engagement. We’ve been globally recognized for adaptability, innovation, and impact: [HundrED Global Innovations](#), [Christian Science Monitor](#), [Digital Promise](#), [Christensen Institute](#) and [Forbes](#).

Work-based learning and durable skills

Parent, community, and alumni engagement

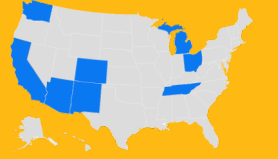

Culturally-relevant curriculum

Project-based STEAM learning
