10-3A Lesson Master

Questions on SPUR Objectives
See pages 650–653 for objectives.

SKILLS Objective A

In 1–4, a system is given. Solve each system by substitution.

1.
$$\begin{cases} x = 3y + 5 \\ 2x - 4y = 12 \end{cases}$$

2.
$$\begin{cases} n = -2m + 1 \\ 6m + 4n = 12 \end{cases}$$

3.
$$\begin{cases} 4a - 5b = 6 \\ a = 7b - 10 \end{cases}$$

4.
$$\begin{cases} c = -3d + 4 \\ 2c + 4d = 4 \end{cases}$$

5. Kendra is solving
$$\begin{cases} 3x - 6y = -24 \\ 2x + 8y = 56 \end{cases}$$
. Fill in the missing portions of her work to find solutions to the system.

$$3x = -24 + 6y$$

$$x = \frac{-24 + 6y}{3}$$

$$x = \underline{\hspace{2cm}}$$

$$2(\underline{\hspace{2cm}}) + 8y = 56$$

$$\underline{\hspace{2cm}} + 8y = 56$$

$$-16 + 12y - 56 = 0$$

$$12y = \underline{\hspace{2cm}}$$

$$y = \underline{\hspace{2cm}} \text{ and}$$

$$x = \underline{\hspace{2cm}}.$$

USES Objective G

6. Keith purchased 80 jerseys for his football team. The total cost for the jerseys was \$3,824. Small jerseys cost \$38 each and large jerseys cost \$52 each.
- Describe the situation with a system of equations. _____
 - How many jerseys of each size did Keith purchase for his team? _____
7. One group of students ordered 3 hamburgers and 5 veggie burgers for a total cost of \$48.30. Another group ordered 4 hamburgers and 5 veggie burgers for \$51.95. How much does a veggie burger cost?
