PROJECT COMPLETE

The new Matilda F. Dunston Elementary School is complete. The new facility expands the school to 500 students and now includes fourth and fifth grades. The school includes 26 classrooms, 2 computer labs, a media center, an art room, a music room and project lab. The school has a large multipurpose room that can be divided into a cafeteria, and physical education classroom or a performance space with a stage. The overall school campus was enlarged to allow for new 3-5 year old and 6-12 year old playgrounds, an outdoor terraced classroom, school gardens and 136 parking spaces. Additionally, a new bus loop and separate carpool lane was created to improve student safety and keep stacked cars on the school campus.

PROJECT DATA

Scope: Design a new 77,434 square foot, 500 student, 4K-5, two-story facility on the existing site.

Project Budget: \$29.6 Million

Schedule:

Design Completion: March 2018

Construction Start: June 2018

School Occupancy: August 2019

Site Completion: November 2019

Final Completion: December 2019

Square Footage: 77,434 SF

Site Size: 8.6 acres
