

School Improvement Council Math Virtual Escape Room

In lieu of a traditional in-person math night, the School Improvement Council at JME hosted a Math Virtual Escape Room. This was an online event that families could enjoy and complete together. The event was open for one calendar week to allow families to choose a day and time that best fit their busy schedules. There were three leveled versions of the Math Virtual Escape Room (Kindergarten-1st grade, 2nd-3rd grade, and 4th-5th grade). About 520 students in the school participated in this online event. The class with the most participation in each grade level won a pizza party. In addition, each student who completed the escape room received a mini-Rubik's cube. There were also 9 daily winners for "treasure box" prizes during the week of the event. Both JME students and their parents enjoyed the event. Some saying it was so fun and loved the idea of having something technology related that was educational, but that we could do together!

The JME SIC is looking forward to creating more Math Virtual Escape Rooms. In the meantime, feel free to participate in the Math Virtual Escape Rooms from last year. In addition, we are in the process of developing some Reading Virtual Escape Rooms. So be sure to stay tuned!
