

# LET'S GET ENGAGED

*Stay committed to Education!*

**Be Present, Be Involved, and Be Motivated** to increase engagement and school attendance for the 2021-2022 school year. School success starts with attendance.

This year more than ever, we have to stand as a united front in supporting our students in every way. The pandemic has brought about many hardships for our schools, students and families. Many students struggled to adjust to online and hybrid models. Student engagement was impacted drastically and in many cases, negatively.

In an effort to increase school wide attendance and academic achievement, the district is encouraging families, community partners, and CCSD staff to connect and work together in providing resources, support, and encouragement to our students.

The Department of Alternative Programs and Services and the Attendance/Tuancy Project Team are asking for everyone to support the "Let's Get Engaged" campaign reminding students and families that every day counts!

Please see the attached links and materials available to share with your school and community. This year-long effort will only be successful with your help!
