

**Putnam WPCA, assisted by Avanti Corporation,
will be knocking on doors May 20th & May 21st between 12 and 6 pm!**

Under the Lead and Copper Rule Revisions (LCRR), Putnam’s Water Pollution Control Authority (WPCA) is required to identify residents’ drinking water service line materials by October 2024.

The U.S. Environmental Protection Agency (EPA) chose Putnam to participate in Lead Service Line Replacement (LSLR) Accelerator Pilot Program. The Program addresses barriers and accelerates progress toward lead service line (LSL) identification and replacement.

Putnam WPCA and EPA’s contractor, Avanti Corporation, may knock on your door to identify your property’s drinking water service line material. They will check the line coming INTO the home, often leading straight to the water meter. If they knock, please let them in. The process takes about 5 minutes.

The Avanti LSL Accelerators who may knock on your door are below.

They will have badges identifying them as EPA Accelerator Team Members.
