

AP Statistics
Required Summer Assignment
May 2024

Dear AP Statistics students and families,

We are very excited that you will be taking AP Statistics as an elective course next year. To get students thinking statistically and to ensure students are prepared for the increased rigor and pace of an AP math class, we have put together an assignment on Delta Math for students to complete over the summer. The link to join the class and access the problems set is at the bottom of this letter.

The assignment covers basic statistical concepts so that students can familiarize themselves with vocabulary and basic concepts from the past. It also includes practice with algebraic skills that are relied on to perform calculations in AP Statistics.

The assignment is due by 8am on Monday, August 12, the first day of school. These concepts will be integrated into assessments early in the school year.

If you have any questions about this assignment or the requirements for AP Statistics, please reach out at any time this summer.

Sincerely,
Amanda Peper
Mathematics Department Chair

Students can join the Delta Math class by joining the link below:

<https://www.deltamath.com/students?code=X77H-B3DD>

Returning students can join with their school Google email address.

New students can join with a personal or parent email address until school begins.
