Life is full of **OPPORTUNITIES**, let us help you find yours.

The Kingsway Regional School District is truly a team *Committed to Excellence* for every child. We recognize that the purpose of education is to not only provide intellectual growth but also to instill an intrinsic desire to continuously seek improvement through learning for both students and faculty. Therefore, we are dedicated to providing high quality professional learning through a variety of approaches to continuously develop as a district that serves its community. Faculty members have collaborative time built within the school day to meet as professional learning teams to build new instructional skills to accomplish desired student outcomes. Through collaboration, open discussion, and consistent innovation, we have an opportunity to create a dynamic culture, in which to learn and work as a family.

Dr. James J. Lavender, Superintendent
