

# How to Update Your iPad

## Keep Your iPads Updated

1. Make sure your iPads are updated with the latest iOS (iPad Operating System).  
Click here to see the most [Recent iPad OS Update](#).
2. If your iPad is more than one iOS behind your iPads may not work as well. If the iPad is still on iOS 12 when the newest update is iOS 14 then it is past time to install a new iOS.
3. Here is how to update the iOS.
  - a. Check the current iOS on the iPad
  - b. Open Settings 
  - c. Open General and then About.
  - d. Check the Software Version to see if the number matches the most recent iOS from Apple's website.  
[Click here](#).

- e. If the iPad is more than one number behind the current iOS number listed on the Apple website, open Software Update. Make sure the iPad is plugged in or the update will not install.
- f. Open the Download and Install to begin updating the iPadOS. This process can take 30-60 minutes.
