

Background

Federal regulations at <u>7 CFR 210.31</u> require local education agencies (LEAs) participating in the National School Lunch Program to complete an assessment of their local school wellness policy at least once every three years and make the results available to the public. This triennial assessment must measure the implementation of the local school wellness policy and include:

- The extent to which schools under the jurisdiction of the LEA are in compliance with the local school wellness policy;
- The extent to which the LEA's local school wellness policy compares to model local school wellness policies;
- A description of the progress made in attaining the goals of the local school wellness policy.

LEAs may use a variety of methods to assess compliance and determine progress of their goals and objectives. Action planning documents that contain timelines, goals, and key tasks may assist in assessing changes over time. For example, the School Health Index (SHI) from the Centers for Disease Control and Prevention is a comprehensive self-assessment tool that helps with action planning and recordkeeping (a shorter version of the SHI is available from Alliance for a Healthier Generation), and the WellSAT 3.0 is an online tool that indicates the strengths and weaknesses of your written policy.

Triennial Assessment Tool and Report Template

When completed in full, this form may serve as both a triennial assessment tool and public report to meet the requirements in federal regulations and prepare for the Administrative Review by the Pennsylvania Department of Education (PDE), Division of Food and Nutrition. This document is intended to be completed using LEA-level information; however, the LEA may determine that a report from each school site, or alternatively, each school level (i.e., elementary, middle, high school) works better in assessing compliance and progress over time. For larger school districts, reporting on a district level may be challenging due to variation in sites' programs and progress in attaining wellness goals. If completing this report for the entire LEA, answer questions using the best available information and consider noting individual building variations or concerns in the "notes" sections.

In the left columns, indicate whether the listed goal or practice is included in your local school wellness policy. **Bolded** policy elements are required by federal regulation. When bolded items are not in the local policy, include an explanation. This tool uses the Pennsylvania School Boards Association's school wellness policy template (available on PDE's <u>Local School Wellness Policy Information webpage</u>) as the model wellness policy for comparison purposes, but it can be used regardless of the template used to develop your local policy.

In the right columns, indicate implementation of the goal or practice at schools within the LEA. LEAs are always encouraged to develop additional policy elements and goals for schools under their jurisdiction to create a supportive environment for student nutrition and physical activity.

Space is provided at the end of the form for the LEA to describe the progress made in attaining the goals of the local school wellness policy as required.

•	0	We limit the number of food fundraisers at school and have procedures in place for requesting a fundraiser exemption (i.e., selling foods that do not meet Smart Snacks) in accordance with limits set by PDE.	©	0	0
•	0	We have local standards in our written policy for foods and beverages offered for free to students at school, including food rewards, items offered at classroom parties and celebrations, and foods/beverages provided to the class as shared classroom snacks.	•	0	0
©	0	We provide a list of nonfood ideas and healthy food/beverage alternatives to staff and parents/guardians.	•	0	0
•	0	Only foods and beverages that meet or exceed federal nutrition standards (USDA Smart Snacks in School) are permitted to be marketed or promoted to students during the school day. Examples: posters, vending machines, menu boards, cups for beverage dispensing, coolers, trash cans.	•	0	0

Notes on nutrition guidelines for foods and beverages at school:

All foods served to students in our cafeteria, bistro and vending locations are aligned with SNP and smart snack standards.

* At least one goal for these categories must be included in the written policy per federal regulations.

Report on the progress made in attaining the goals of the wellness policy (REQUIRED):

The wellness policy is designed to ensure that AGCS students are exposed to knowledge and experiences that foster a healthy lifestyle, while encouraging good food choice and promoting physical activity.

It was our goal in the 2021 wellness assessment to introduce new menu items to the food service department. We have succeeded in this goal going from a 3 week menu cycle offering only 2 or 3 entree options daily to a 4 week menu cycle offering 4 entree options daily. This has greatly expanded the nutritional experience and satisfaction of our students. Our second goal was to work with the PE department to incorporate nutrition education classes to include reading nutrition labels, meal planning and media awareness. Currently 8th graders doing a Myplate project that includes a food truck where they build dishes with the understanding of what should be included in a well rounded diet.

We will continue to expand on this goal throughout the other grade levels during the 24/25 school year and beyond.

AGCS offers free breakfast to all students and both our breakfast and lunch programs follow SNP guideline for healthy meals.

We offer multiple competitive sports programs as well as after school sports clubs which have a positive impact on our students mental and physical health.

Our micro farm educated students about the dietary benefits of fruits, vegetables, eggs, and fresh honey while also teaching responsibility for farming all of these items.

AGCS also participates in Healthy Champions sponsored by Penn State & we partner with the YMCA to Provide free memberships to our 7th grade students each year.

It is the goal of the food service department to introduce new items through student surveys and more taste testing during the 24/25 school year and beyond.
