One	Do Not Attempt Resuscitation/I							
-		cardiopulmonary arro	-					
B Check One	MEDICAL INTERVENTIONS	•		-	use of medicati	on by		
	Comfort Measures Only (Allow Natural Death). Relieve pain and suffering through the use of medication by appropriate route, positioning, wound care and other measures. Use oxygen, suction and manual treatment of airway obstruction as needed for comfort. Patient prefers no transfer to hospital for life-sustaining treatments. Transfer if comfort needs cannot be met in current location. Treatment Plan: Maximize comfort through symptom management.							
	 Limited Additional Interventions In addition to care described in Comfort Measures Only, use medical treatment, antibiotics, IV fluids and cardiac monitor as indicated. No intubation or mechanical ventilation. May consider less invasive airway support (e.g., CPAP, BiPAP). <i>Transfer to hospital if indicated. Generally avoid the intensive care unit.</i> Treatment Plan: Provide basic medical treatments. 							
	Intubation and Mechanical Vent Interventions, use intubation and if indicated. Treatment Plan: Life	tilation In addition to care mechanical ventilation a	as indicated. Tra	nsfer to hospita	I and/or intensive
