Course Name: Keyboard / Piano

Born On: July 2021
Revised On: August, 2023
Board Approval: 8/28/23

Course Description: Keyboard/Piano

The keyboard/piano course is a performance-based class for those students who are interested in learning to play piano/keyboard, or seeking to improve their keyboard skills. The class is open to students from beginner to advanced level. No audition is required to be accepted to this class. Each student will develop a repertoire of piano pieces that will be suitable to his/her level. The students will be evaluated based on their performances at the end of each semester. Students will have an opportunity to perform at a student-organized recital at the end of each semester. In addition, students are encouraged to participate in school concerts as accompanists, chamber music players, or soloists.

As a result of completing the keyboard/piano course, students learn to appreciate the joy of the musical performer. Students develop an awareness of the discipline and effort that evolves from preparing musical selections. They develop the physical as well as musical coordination necessary for musical performance on an instrument. Through the study of many styles, the student learns to respect the technique and creativity of artists in the many diverse expressions of musical performance.

Generally, the course is taught in group classes, with individual instruction inserted as the need develops. Periods of time for individual practice are scheduled within the framework of the course after the introduction of new materials.

By the end of this course, all students demonstrate proficiency in at least one chosen arts discipline by meeting or exceeding the content knowledge and skills delineated in the arts standards.

In today's global economy, students need to be lifelong learners who have the knowledge and skills to adapt to an evolving workplace and world. To address these demands, Standard 9, Career Readiness, Life Literacies and Key Skills, which includes the 12 Career Ready Practices, establishes clear guidelines for what students need to know and be able to do in order to be successful in their future careers and to achieve financial independence. Career readiness, life literacies and key skills education provides students with the necessary skills to make informed career and financial decisions, engage as responsible community members in a digital society, and to successfully meet the challenges and opportunities in an interconnected global economy.

Interdisciplinary Connections

Music encompasses a broad multidisciplinary field within its own academic area, including the teaching of creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies. The NJSLs are designed to integrate four core music standards related to creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies. These interdisciplinary

connections, as a result, are present within the current standards. Below are some ways that interdisciplinary connections can be implemented into music curricula.

21st Century Themes & Skills

The following content statements can be integrated into any of the adopted Music strands (creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies).

- CRP2. Apply appropriate academic and technical skills.
- CRP4. Communicate clearly and effectively and with reason.

- CRP6. Demonstrate creativity and innovation.
- CRP7. Employ valid and reliable research strategies.
- CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.
- CRP9. Model integrity, ethical leadership and effective management.
- CRP10. Plan education and career paths aligned to personal goals.

At the high school level (grades 9–12), all students are required to complete five credits in Visual and Performing Arts as part of the course requirements to receive a high school diploma (N.J.A.C. 6A:8-5.1). Because students’ experiences and course offerings at the middle and high school levels may vary, the new grade 9–12 standards are described in three levels of proficiency. The three levels—proficient, accomplished, and advanced—are flexible enough to accommodate varying degrees of achievement by students during high school, including those who build on their K–8 foundation by pursuing deeper engagement in one arts discipline, as well as those who explore a wide range of artistic pursuits and experiences at the high school level.

Proficient	Accomplished	Advanced
<p>Students at the proficient level have developed the foundational technical and expressive skills and understandings in an art form necessary to solve assigned problems or prepare assigned repertoire for presentation; make appropriate choices with some support; and may be prepared for active engagement in their community. They understand the art form to be an important form of personal realization and well-being, and make connections between the art form, history, culture and other learning.</p>	<p>Students at the accomplished level are, with minimal assistance, able to identify or solve arts problems based on their interests or for a particular purpose; conduct research to inform artistic decisions; and create and refine arts performances, products, or presentations that demonstrate technical proficiency and personal communication and expression. They use the art form for personal realization and well-being and have the necessary skills for and interest in participation in arts activity beyond the school environment.</p>	<p>Students at the advanced level independently identify challenging arts problems based on their interests or for specific purposes and bring creativity and insight to finding artistic solutions. They are facile in using at least one art form as an effective avenue for personal communication, demonstrating a higher level of technical and expressive proficiency characteristic of honors or college level work. As arts learners, they exploit their personal strengths and apply strategies to overcome personal challenges. They are capable of taking a leadership role in arts activity within and beyond the school environment.</p>
<p>A level of achievement attainable by most students who complete a high school level course in the arts (or equivalent) beyond the foundation of quality K–8 instruction.</p>	<p>A level of achievement attainable by most students who complete a rigorous sequence of high-school level courses (or equivalent) beyond the proficient level.</p>	<p>A level and scope of achievement that significantly exceeds the accomplished level. Achievement at this level is indisputably rigorous and substantially expands students’</p>

		knowledge, skills, and understandings beyond the expectations articulated for accomplished achievement.

Music assessments like other content area assessments should be a natural and ongoing part of the teaching and learning process. The more authentic the assessment process is, the better the chance that students will see the interdisciplinary connections between music and other areas of study, as well as the role of music in their lives as citizens.

1. What factors should be considered in planning for assessment?
 - Content mastery (which standards are being assessed)
 - Analysis of content
 - Skills development
 - Connections between and among essential learnings
 - Connections between the past, present, and the future
 - Interdisciplinary connections
 - Diversity in student learning styles and needs
 - Opportunities for democratic participation
2. How are goals of instruction and assessment related?
 - Are the goals for learning actually being assessed?
 - To what degree are we asking students to extend learning?
 - Can students transfer their learning to a new situation?
 - Does the assessment reflect what is valued instructionally?
 - Does the assessment benefit the learner by informing teaching practices?
 - Does the assessment allow for a variety of learners to demonstrate their understanding?
3. What should you consider as you develop criteria for scoring?
 - How many ways can students demonstrate they have learned the material?
 - How will students be scored?
 - How will the needs of a variety of learners be addressed with this assessment?
 - Does the scoring tool reflect the learning goals?
4. What are the most constructive assessment designs and methods for music educators?
 - Performance assessment
 - Authentic assessment
 - Authentic instruction
 - Portfolio assessment

Music and Technology K-12 Indicators

As teaching, learning and curriculum across New Jersey evolves to better meet student needs, teachers when addressing standards in music are expected to integrate the adopted 8.1 Educational Technology, 8.2 Technology Education, Engineering, Design, and Computational Thinking - Programming, and 21st Century Skills into their classroom practice. To that end, teachers will be expected to apply the following anchor standards into their classroom practice.

The following content statements can be integrated into any of the adopted Music strands (or methodologies).

Educational Technology

8.1.12.DA.5

8.1.12.CS.2

8.1.12.CS.3

- Understand and use technology systems.
- Select and use applications effectively and productively.
- Apply existing knowledge to generate new ideas, products, or processes
- Create original works as a means of personal or group expression.

8.2 Technology Education, Engineering, Design, and Computational Thinking - Programming

8.2.12.NT.2

8.2.12.ETW.1

The following content statements can be integrated into any of the adopted Music strands (creative process, history of the arts and culture, performing and aesthetic responses & critique methodologies).

- The characteristics and scope of technology.
- The core concepts of technology.
- The relationships among technologies and the connections between technology and other fields of study.
- The cultural, social, economic and political effects of technology.
- The effects of technology on the environment

**Evidence of Student Learning
Assessment Design**

What have you learned?

Assessment:

Other Evidence: Through what other evidence (work samples, observations, quizzes, tests, journals, benchmark, alternative assessments or other means) will students demonstrate achievement of the desired results. [Formative](#) and [summative](#) assessments used throughout the unit to arrive at the outcomes.

Suggested Writing Activities:

- Essay responses to non-fiction reading
- Food label activities

Student Self-Assessment: How will students reflect upon or self-assess their learning?

Modifications and Accommodations for Differentiation Strategies:

Students with special needs: Support staff will be available to aid students related to IEP specifications. 504 accommodations will also be attended to by all instructional leaders. Manipulatives, extra time, alternative assessments, and scaffolding strategies will be used to support learning. The use of Universal Design for Learning (UDL) will be considered for all students as teaching strategies are considered.

Multilingual students: Students will be supported according to the recommendations for “can do’s” as outlined by WIDA based on the student’s level of English Language Proficiency (ELP). - https://www.wida.us/standards/CAN_DOs/. Provide additional time as needed. Provide bilingual dictionaries for students who are literate in their first language.

Students at risk of school failure: Formative and summative data will be used to monitor student success at first signs of failure student work will be reviewed to determine support this may include parent consultation, basic skills review, and differentiation strategies (i.e. provide vocabulary lists with user-friendly definitions, add images that illustrate the content).

Gifted and Talented Students: Students excelling in the mastery of standards will be challenged with complex, high-level challenges related to reading and writing learning including variations in content, process, products, and learning environments.

Differentiation/Modifications

Curriculum Differentiation is a process teachers use to increase achievement by improving the match between the learner's unique characteristics: prior knowledge, cognitive level, learning style, motivation, strength or interest and various curriculum components: Nature of the objective, teaching activities, learning activities, resources and products. This broad notion applies to learners from a diverse range of abilities, including: Gifted and Talented, Multilingual Students, Students with Disabilities, and Students at Risk of School Failure. Music is a field of education that provides educators with a wealth of opportunities for differentiation, but also real challenges of meeting the needs of diverse learners. This addendum reveals pathways for music differentiation specific to four distinct student populations.

Teachers can differentiate

- Content: What we teach and how we give students access to the information and ideas that matter
- Process: How students come to understand and “own” the knowledge, understanding, and skills essential to a topic
- Product: How a student demonstrates what he or she has come to know, understand and be able to do as a result of a segment of study

According to students'

- Readiness-The current knowledge, understanding, and skill level a student has related to a particular sequence of learning
- Interest What a student enjoys learning about, thinking about, and doing
- Learning Style A student's preferred mode of learning. It is influenced by learning style, intelligence preference, gender and culture

The NJ Visual and Performing Arts Model Curriculum <https://www.state.nj.us/education/modelcurriculum/vpa/m/> contains an indepth overview for meeting the needs of diverse learners in Music. Many of these content specific suggestions are classroom ready.

#	STUDENT LEARNING OBJECTIVES	New Jersey Music Anchor Standards
1	Aurally and visually identify melodic and/or rhythmic motifs and identify changes in time signature, tempo, rhythm, melody, harmonic and timbre that are the same, different and/or recurring.	4
2	Identify the genre and historical period and culture of various musical selections, using identifying elements such as tempo, rhythm, melody, harmony and timbre.	4, 11
3	Analyze compositions from different world cultures and genres with respect to technique, musicality, and stylistic nuance, and sight-read/ or play simple pieces from at least two cultures or genres, with technical accuracy, appropriate musicality, and the relevant stylistic nuance.	7, 10, 11
4	Perform and record a musical selection (using a digital recording device or program such as Smart Music) and use self evaluation and/or class critique to identify what was performed well technically and where additional practice/study would improve performance and assist in accomplishing musical objectives. Record the same selection again and compare and contrast the two performances and set new performance goals.	2, 5, 9
5	<p>Content Statement: Understanding nuanced stylistic differences among various genres of music is a component of musical fluency. Meter, rhythm, tonality, and harmonics are determining factors in the categorization of musical genres.</p> <p>Cumulative Progress Indicator: Examine how aspects of meter, rhythm, tonality, intervals, chords, and harmonic progressions are organized and manipulated to establish unity and variety in genres of musical compositions.</p>	9
