Northshore School District

Grades 6, 8, 10 and 12

Introduction and Overview

Local survey participation rate**:

This report presents results from the fall 2023 Healthy Youth Survey in Washington State. This survey was sponsored by the Health Care Authority (HCA), the Department of Health (DOH), the Office of Superintendent of Public Instruction (OSPI), and the Liquor and Cannabis Board (LCB) in partnership with schools throughout the state of Washington.

This Multiple Grade Report does not provide comparisons to the state. To compare local results to the state sample, see the Multiple Grade State Sample Report for grades 6, 8, 10 and 12. This report is available at: https://www.askhys.net/SurveyResults/FrequencyReports

Survey questions covering the same topics are grouped together when possible. Use the Questions by Topic index for related questions when searching for information on a specific topic. The numbering in this report is not the same as the question order on the survey itself.

The dot points and graphs included at the beginning of this report highlight selected findings. Additional information may be found in the *HYS Interpretive Guide* posted to the Healthy Youth Survey web site under Data Resources: https://www.askhys.net/Resources/Data.

48%

Survey Participation in this Report	Grade 6	Grade 8	Grade 10	Grade 12
Number of students surveyed:	1,575	1,539	1,353	902
Number of valid responses:	1,565	1,515	1,330	885
Number of enrolled students*:	1,744	1,747	1.891	1,839

90%

Caution about Participation Rates and Bias

Please use the following guidance when reviewing results:

- 70% or greater participation Results are likely representative of students in this grade.
- 40-69% participation Results may be representative of students in this grade.
- Less than 40% participation Results are *likely not representative* of students in this grade but do reflect students who completed the survey.

There may be limitations to the results, even with a high participation rate. For instance, a particular group of students (e.g., the school orchestra) may have been away from school the day of the survey, and that could bias the results. It is important to acknowledge the potential limitations when using the results in this report. For reports summarizing results at the county or school district level, you should also consider whether the schools that participated represent all students in that area.

Small Numbers: Caution about Number of Students Participating

Results based on small numbers of students answering a question are unstable---that is, they could easily change with the absence from school of only a couple of students. This is especially the case when only a few students choose a particular answer option. Also, in this situation, the reported 95% confidence interval (CI) might be too wide. Thus, use caution if fewer than 30 students answered a question and fewer than 5 students selected a given response option.

For example, if 20 students answered a question and of those 20 only 3 students answered "Yes", the estimate is unreliable.

See the Understanding Results section later in this report for a discussion of "confidence intervals" to help guide your interpretation of the results.

^{*} The estimate of enrolled students is based on figures from the 2023-24 school year, provided by OSPI.

^{**} The survey participation rate is the number of valid responses divided by the number of enrolled students.

Special Considerations for HYS 2023, Methodologic Changes, and the COVID-19 Pandemic

- 1) Due to the unexpected shift to primarily remote learning in 2020 as a result of the COVID-19 pandemic, the HYS was not administered in fall 2020 as it was originally intended. Instead, the HYS Planning Committee determined it would be best to delay the survey to fall 2021, thereby switching to an odd-year administration. The decision was made to expand e-survey/online survey administration across the state and in 2023, the survey was fully online. Changes to the survey years (even to odd), the shift to an online survey, and other methodologic changes in 2023 influence how we interpret data trends over time. Delaying the survey by a year changed the cohort of students being surveyed. HYS has historically been offered in Fall of even years to students in grades 6, 8, 10 and 12, So, roughly the same cohort of students were ultimately being surveyed every two years as they advanced. For 2021 and 2023 this cohort shifted. It is too soon to determine if this has had a measurable impact on the results and how this potential impact might interact with other survey changes.
- 2) The Planning Committee chose to halt plans for a more extensive evaluation of the e-survey mode compared to paper that was scheduled for HYS 2020. Instead, the shift to an e-survey mode without the in-depth comparison makes it more difficult to determine whether the survey mode (paper vs e-survey) has an effect on how students answer questions. Only a very small number of schools elected to do the survey on paper in 2021 and the survey was fully online in 2023.
- 3) Schools were allowed to administer the e-survey remotely in Fall 2021 to accommodate students who may be doing hybrid or fully distanced learning. The vast majority of students took the survey in-person at school, though a small number did take the survey remotely. In 2023, online/virtual schools were permitted to administer the survey remotely, but again, the vast majority of students took the survey in person. The potential impact of having students complete the survey remotely is still being assessed and will take additional years of data to fully understand.
- 4) The pandemic itself has led to massive changes in the lives of Washington youth. Changes in HYS 2021 and 2023 data may be more a reflection of the pandemic and its effect on the lives of youth than changes that would have happened if the pandemic had not occurred. This means that trend data from before the pandemic and during/after the height of the pandemic should be interpreted with tremendous caution. For example, a large decrease in one particular risk behavior on school property may be explained by a new school education campaign or program or it may be explained by the fact that students are doing more remote learning.
- 5) While HYS 2021 was a particularly unique survey year, HYS 2023 is the beginning of a new survey era. Several methodologic changes have been put into place, include skip and display logic, a new survey platform, and more languages. As a result, the survey is becoming both more accessible to all students and the data it produces are more useful. However, the potential impact of these changes will take time to assess and a single year of data is likely not enough to fully distinguish between true data trends and changes resulting from the methodology. As more data are collected, the Planning Committee will continue to evaluate and share recommendations on interpreting results.

Key to the Notes

Two versions of the survey, Elementary and Secondary, were used in the administration of the 2023 HYS. The Secondary survey was given to students in grades 8, 10, and 12 (and in grades 9 and 11 in some small school districts). The Secondary survey included six questions on sexual behavior and sexual violence. Schools that did not want to administer these questions were required to seek an exemption from the Planning Committee. The Elementary survey was given to elementary students in grade 6 (and in grade 7 in some small school districts). The survey for secondary students included questions on sexual orientation and gender identity. In prior years these questions were removable. The Elementary survey included an optional gender question that schools could opt to include during the registration process.

Questions on the Secondary survey were randomized. Some questions were asked of all secondary students, others were only asked of about half the students. A list of the topics asked and their location in the report are provided in the Questions by Topic section at the end of this report. "Core" questions were asked of all secondary students. A list of Core Questions is also found at the end of this report.

The following notation is used throughout this report to indicate the questions that schools could choose not to administer by requesting an exemption. Information about the exemption process for 2023 is available at: https://www.askhys.net/Hys/Exemptions.

† = exempt questions

A double asterisk is used throughout this report to indicate that a question was not asked of a grade level.

** = not asked of the grade level

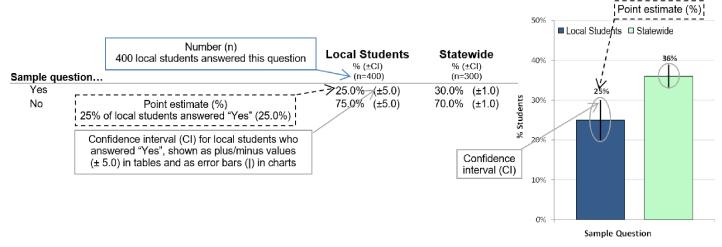

Legal requirements: Federal and Washington State regulations prohibit discrimination against Limited English Proficiency individuals and/or individuals who are Deaf, DeafBlind, Hard of Hearing, or visually impaired. Read <u>HCA Policy 01-27 Language Access Services</u> and <u>Policy 01-30 Equal Access to Services for Individuals with Disabilities</u> for more information. If you have a question about an accommodation, please contact the Healthy Youth Survey study Principal Investigator, at Healthy. Youth@doh.wa.gov or call toll free (877-HYS-7111).

Understanding Results

N's

In this report "n" is shorthand for "number", the number of students who took this survey or who answered a survey question. N's are important! We also report the point estimates (%), and the 95% confidence intervals (CI).

Here is an example of how results are displayed in the report tables and charts.

How many students took this survey?

Look on page 2, under Survey Participation. The "number of students surveyed" is the number of surveys that we received. We have careful procedures for "cleaning" to remove surveys with many inconsistent or false answers – the "clean" surveys are the "number of valid surveys". Only valid surveys are presented in this report.

How many students answered each survey question?

The n's for each question vary. Why? There are a few reasons:

- For students in grades 8, 10, and 12, the suvey has core and non-core questions. The n's for core questions are about the same as the number of valid surveys. The n's for non-core questions will be about half, or less.
- Some schools chose to administer the questions about sexual behavior and sexual violence. Schools that chose to not
 ask those additional questions will have no responses for those questions. (District and county reports may include some
 schools that DID ask those questions and some that DID NOT.)
- Students may decide to skip questions.

Here are examples from a district with 400 valid surveys --- notice how the n's change with each question type.

Have you ever, even once in your life used marijuana? No Yes	(n=398) 80.0% (±3.0) 20.0% (±3.0)	(n=4,000) 83.0% (±1.0) 17.0% (±1.0)	N for a core question (almost all students)
Did you eat breakfast today? Yes No	(n=200) 55.0% (±4.0) 44.0% (±4.0)	(n=2,000) 57.0% (±2.0) 43.0% (±2.0)	N for a non-core question (about half the students)
Have you ever been in a situation where someone made you engage in, kissing, sexual touch or having sex when you did not want to? † Yes No	(n=100) 10.0% (±8.0) 90.0% (±2.0)	(n=1,500) 15.0% (±4.0) 85.0% (±1.0)	N for a sexual behavior or sexual violence question (about half, or less if some schools chose not to ask those questions)

Confidence Intervals

It is unlikely that the point estimate (%) reported for each question is exactly the same as the "true" value for all local students. This report includes 95% confidence intervals (CI) to describe this uncertainty. If there is no bias in the data, then there is a 95% chance that the CI will include the true value. So, for example, if the point estimate and CI are 51.5% (±1.5%), then there is a 95% chance that the true percentage is between 50.0% and 53.0%.

The size of CIs depends in part on the n for each question – as more students answer a question, the point estimate is likely to be closer to the "true" value. If the group of students is small, then the CIs will be large. The CI does not account for the participation rate – in other words, a low participation rate can create bias which will not be reflected in the CI.

How can confidence intervals be "used"?

Cls help decide if the differences between local results and the statewide results are statistically significant.

For an example, students report 25% ± 5 %. That means that the CI is between 20% and 30% Here is the math: 25% -5% = 20%, and 25% +5% = 30%

- 1. A significant difference:
 - Local students report 25% ±5%. The point estimate is 25% and the CI is 20% to 30%
 - Statewide, students report 36% ±3%. The point estimate is 36% and the CI is 33% to 39%
 - The CIs don't overlap. The difference is significant

- 2. Not a significant difference:
 - Local students report 25% ±5%. The point estimate is 25% and the CI is 20% to 30%
 - Statewide, students report 28% ±3%. The point estimate is 28% and the Cl is 25% to 31%
 - The CI for local students overlaps the point estimate for students statewide. The difference is not significant

Local students
$$\stackrel{20\%}{\leftarrow}$$
 25% 30% $\stackrel{25\%}{\rightarrow}$ Students statewide

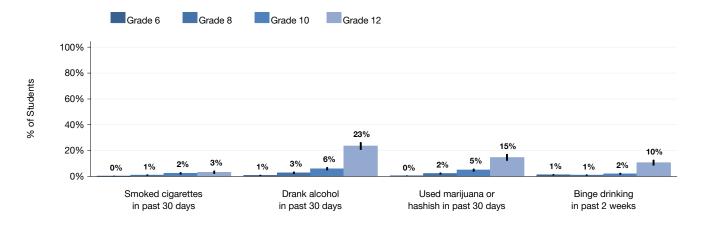

- 3. Not sure if there is a difference:
 - Local students report 25% ±5%. The point estimate is 25% and the CI is 20% to 30%
 - Statewide, students report 32% ±3%. The point estimate is 32% and the CI is 29% to 35%
 - The CIs overlap, but don't include the two point estimate. It is uncertain to determine significance and will require further testing. A significance testing tool is available on the Healthy Youth Survey web site under Data Resources: https://www.askhys.net/Resources/Data

More information about interpreting CIs is available on the Healthy Youth Survey web site under Data Resources: https://www.askhys.net/Resources/Data, including past HYS training materials and a "Tool for Determining HYS Statistical Significance". Use the "tool" to find out if local results are significantly different.

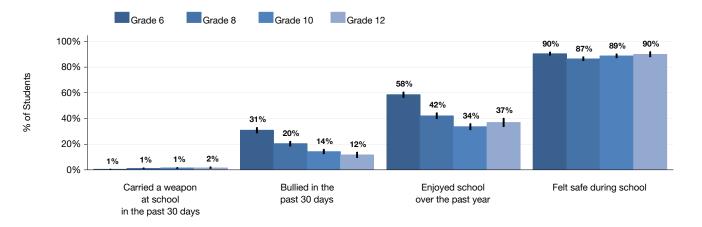

Highlights of the Local Results

Local students reported the following behaviors and attitudes:

	Grade 6	Grade 8	Grade 10	Grade 12
Substance Use	% (± CI)	% (± CI)	% (± CI)	% (± CI)
Smoked cigarettes in past 30 days	0.2% (±0.2)	0.9% (±0.5)	2.3% (±0.9)	3.2% (±1.3)
Drank alcohol in past 30 days	0.7% (±0.4)	2.7% (±0.8)	5.8% (±1.3)	23.5% (±3.1)
Used marijuana or hashish in past 30 days	0.3% (±0.3)	2.1% (±0.7)	4.7% (±1.2)	14.6% (±2.6)
Binge drinking in past 2 weeks	1.2% (±0.5)	0.9% (±0.5)	1.8% (±0.7)	10.5% (±2.2)

Grade 6	Grade 8	Grade 10	Grade 12
% (± CI)	% (± CI)	% (± CI)	% (± CI)
0.5% (±0.4)	1.3% (±0.6)	1.4% (±0.7)	1.6% (±0.9)
30.8% (±2.3)	20.4% (±2.1)	14.2% (±2.0)	11.6% (±2.3)
58.5% (±2.5)	42.2% (±2.5)	33.6% (±2.7)	37.0% (±3.5)
90.4% (±1.5)	86.5% (±1.8)	88.6% (±1.8)	90.0% (±2.2)
	0.5% (±0.4) 30.8% (±2.3) 58.5% (±2.5)	% (± CI) % (± CI) 0.5% (±0.4) 1.3% (±0.6) 30.8% (±2.3) 20.4% (±2.1) 58.5% (±2.5) 42.2% (±2.5)	% (± CI) % (± CI) % (± CI) 0.5% (±0.4) 1.3% (±0.6) 1.4% (±0.7) 30.8% (±2.3) 20.4% (±2.1) 14.2% (±2.0) 58.5% (±2.5) 42.2% (±2.5) 33.6% (±2.7)

For more information on specific HYS topics, see the Fact Sheets at www.AskHYS.net, under HYS Results – Fact Sheets

Gender Identity and Sexual Orientation

The next four items display data on gender identity and sexual orientation of participating students. There are different ways to look at these data. Items 5 and 7 show mutually exclusive categories. This means that every student is counted only one time. If a student indicated more than one identity, they are included in the bottom row (more than one identity marked). These items have been reported in prior HYS reports. Items 6 and 8 are new this year and show the data in non-mutually exclusive categories. This means that each student is counted for every identity they indicated. Each category displays the number of students who indicated they are of that particular sexual orientation or gender identity, either alone or in combination with another. Because these are not mutually exclusive categories the total will be more than 100%. The HYS continues to evolve, as do our reporting practices, to focus more on highlighting student identity and limiting erasure of students with multiple identities.

Grade 6 Grade 8 Grade 10 Grade 12 6. Below is a list of terms that people may use to describe their gender identity. Choose all that apply. (n=0)(n=1.402)(n=1.283)(n=864)** Heterosexual/Straight 71.6% (± 2.5) 72.8% (±2.3) 65.7% (± 3.2) ** Gay or lesbian 1.9% (±0.7) 2.9% (± 0.9) 5.1% (±1.5) Bisexual 5.6% (±1.2) 9.4% (± 1.6) 13.1% (±2.3) Questioning/Not sure of my sexual orientation 4.5% (±1.1) 3.0% (±0.9) 3.5% (±1.2) Something else fits better 2.9% (±0.9) 3.4% (±1.0) 4.5% (±1.4) I do not know what this question is asking. 7.3% (±1.4) 2.9% (±0.9) 2.2% (±1.0) More than one response selected 5.0% (±1.1) 6.9% (±1.4) 5.9% (±1.6) 9. Below is a list of terms that people often use to describe their sexuality or sexual orientation. Choose all that apply. These are not mutually exclusive categories. Each row shows the number of students who indicate that sexual orientation alone or in combination with other sexual orienations. (n=0)(n=1,402)(n=1,283)(n=864)Heterosexual/Straight 75.6% (±2.3) 75.4% (±2.4) 68.6% (±3.1) Gay or lesbian 3.6% (±1.0) 5.7% (±1.3) 6.9% (±1.7) Bisexual 8.1% (±1.4) 14.3% (±1.9) 16.6% (±2.5) Questioning/Not sure of my sexual orientation 7.5% (±1.4) 6.6% (± 1.4) 6.7% (±1.7) Something else fits better 4.7% 6.0% (±1.3) 6.7% (±1.7) (± 1.1) I do not know what this question is asking. 8.2% (±1.4) 4.3% (±1.1) 3.0% (±1.1)

Race and Ethnicity

The next three items display data on the race and ethnicity of participating students. In the past, HYS asked students about race and Hispanic/Latino/Latina ethnicity with a single question. In 2023, Hispanic/Latino/Latina ethnicity was asked separately from race. Item 10 shows results for Hispanic/Latino/Latina ethnicity. Item 11 shows results for race with mutually exclusive categories. This means that every student is counted only one time. If a student indicated more than one race, they are included in the bottom row (more than one race marked). Item 12 shows the data in non-mutually exclusive categories for both race and ethnicity. This means that each student is counted for every race or ethnicity they indicated. Each category displays the number of youth who indicated they are of that particular race or ethnicity, either alone or in combination with others. Because these are not mutually exclusive categories the total will be more than 100%. HYS continues to evolve, as do our reporting practices, to focus more on highlighting student identity and limiting erasure of students with multiple identities.

Alcohol, Tobacco and Other Drug Use

Alcohol, tobacco, and other drug (ATOD) use has been a major concern in this country for many years. The consequences of ATOD use are well known. In the short term, ATOD use interferes with positive physical, emotional, and social development. In the long term, ATOD use is associated with delinquency and criminal activity, unintended injuries, and a variety of health complications including shorter life expectancy. Tobacco use is the world's leading cause of preventable death, disease, and disability. This section provides information about lifetime ATOD use (which in part reflects experimental use), use in the past 30 days (i.e., current use), and other tobacco-, alcohol-, and drug-related issues.

Lifetime Use

Have you ever, even once in your life:

27. Smoked a cigarette, even just a puff? (Computed from				
question 246)	(n=0)	(n=1,421)	(n=1,212)	(n=746)

Other Health Concerns

Nutrition and Fitness

This section provides results regarding other health concerns including nutrition and fitness, health conditions and health care, safety, behaviors related to intentional injury, and depression. Exercise, nutrition, and access to preventative health care are important components of a healthy life. Safety-related behaviors can profoundly influence the outcome of an accident. Injury is the leading cause of death for adolescents aged 10 to 19, and violence contributes to injury-related deaths. People who are depressed experience a range of symptoms, and depression is associated with suicidal behavior.

The Body Mass Index (BMI) compares a person's height and weight. Lower BMI scores do not necessarily mean better health and higher scores do not necessarily mean worse health. The BMI was designed to look at trends in the population. It is not a great measure of health in adults or children. It is still used in some clinical settings to look at how children develop over time.

33. BMI status. (Computed from numeric responses to "How tall	Grade 6	Grade 8	Grade 10	Grade 12
are you without your shoes on?" and "How much do you	% (± CI)	% (± CI)	% (± CI)	% (± CI)
weigh without your shoes on?")	(n=0)	(n=675)	(n=617)	(n=398)
Under 19	**	43.6% (±3.7)	28.5% (±3.6)	18.3% (±3.8

Disordered Eating and Weight Stigma

Adolescents are exposed to a variety of messaging about body, weight, fitness, and health. This messaging combined with the experiences of each youth can lead to dangerous disordered behaviors with regard to food and body. Sometimes this can result in diagnosed eating disorders and other times these behaviors go undiagnosed and untreated. The following questions assess disordered behaviors and exposure to harmful interactions with others that can affect body acceptance among youth.

Grade 6 Grade 8 Grade 10 Grade 12 % (± CI) % (± CI) % (± CI) % (± CI) 104. During the past year, did you: (Choose all that apply) (n=592) (n=0)(n=698)(n=352) Exercise to lose weight or to keep from gaining weight? 54.7% (±3.7) 58.8% (±4.0) 57.1% (±5.2) ** 49.3% (±5.3) Eat less food, fewer calories or foods low in fat or carbohydrates to lose 37.8% (±3.6) 47.4% (±4.0) weight or to keep from gaining weight? Intentionally go without eating for 12 hours or more (also called fasting) to 20.0% (±3.0) 25.3% (±3.5) 26.4% (±4.6) lose weight or to keep from gaining weight? COVID-19

Students were asked about three strategies to prevent the spread of COVID. They were also asked if they have worries related to how the pandemic might affect their lives.

Grade 6

Grade 8

Grade 10

Grade 12

There are things we can all do to stop the spread of certain illnesses like the flu, colds and COVID. Please rate how often you usually:

	Grade 6	Grade 8	Grade 10	Grade 12
152. Wash your hands or use hand sanitizer between activities	% (± CI) 6. (n=1,533)	% (± CI) (n=725)	% (± CI) (n=596)	% (± CI) (n=377)
Never	1.9% (±0.7)	2.6% (±1.2)	4.4% (±1.6)	4.8% (±2.
Only some of the time	12.4% (±1.7)	15.7% (±2.7)	15.9% (±2.9)	17.0% (±3.
About half of the time	18.4% (±1.9)	18.1% (±2.8)	19.3% (±3.2)	16.4% (±3.

Gambling

158. "Gambling" means betting money or possessions either in person or online, including video poker, phone apps, e-sports, etc. In the past 12 months, has YOUR gambling	Grade 6	Grade 8	Grade 10	Grade 12	
ever caused you problems at home, school or with your friends?	% (± CI) (n=0)	% (± CI) (n=789)	% (± CI) (n=681)	% (± CI) (n=437)	
No, I have not gambled.	**	90.6% (±2.0)	93.2% (±1.9)	88.6% (±3.0)	
No, I have gambled but it has not caused problems.	**	8.9% (±2.0)	6.0% (±1.8)	10.5% (±2.9)	
Yes, I have gambled and it has caused problems.	**	0.5% (±0.5)	0.7% (±0.6)	0.9% (±0.9)	

School Climate

In the past few years Washington State has given increased attention to supportive learning environments. Students need a safe, nurturing, healthy, and civil learning environment if they are to be successful in school. This section provides information about student perceptions of school climate.

159. "Bullying" is when one or more students threaten, spread rumors about, hit, shove, or otherwise hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way. In the last 30 days, how often

Children's Hope Scale

Hope reflects a future orientated mindset and motivational process by which an individual has an expectation toward attaining a desirable goal. Research has linked hope with overall physical, psychological, and social well-being. This section introduces the Children's Hope Scale, an assessment of agency (ability to initiate and sustain action towards goals) and pathways (capacity to find a means to carry out goals).

175. Children's Hope Scale (Computed from questions 176 to

179)	(n=1,440)	(n=1,362)	(n=1,157)	(n=705)
No or very low hope	4.0% (±1.0)	5.3% (±1.2)	5.3% (±1.3)	4.4% (±1.5)
Slightly hopeful	15.5% (±1.9)	14.2% (±1.9)	15.9% (±2.1)	17.3% (±2.8)
Moderately hopeful	26.7% (±2.3)	23.4% (±2.3)	27.1% (±2.6)	28.2% (±3.3)
Highly hopeful	53.8% (±2.6)	57.0% (±2.6)	51.8% (±2.9)	50.1% (±3.7)

Washington Healthy Youth Survey - Adverse Childhood Experiences Scale (WAH-ACEs)

Eleven questions from the HYS were selected to be included in the WAH-ACEs score based on review of public health, social work, and psychology literature on adverse experiences among children, youth and young adults and the association with short and long-term effects on their health and wellbeing. These questions addressed the topics identified in the literature review, including intimate partner violence, physical or sexual abuse by an adult, safety in school, bullying, and financial hardship, among other topics. Some adverse experiences identified in the literature were not captured in HYS questions and could therefore not be included in WAH-ACEs (e.g., neglect).

For each question, a student could get a value of 0 or 1 and these were added up to create their final score. Sometimes students did not answer all questions on the survey; the WAH-ACEs score accounts for any missing answers to give schools and districts a more precise picture of what their students are experiencing. For more information about the WAH-ACEs, please see WAH-ACEs Interpretive Guide.

Social & Emotional Learning

Social Emotional Learning (SEL) is broadly understood as a process through which individuals build awareness and skills in managing emotions, setting goals, establishing relationships, and making responsible decisions that support success in school and in life.

Risk and Protective Factors

Decades of research have shown that certain risk factors are associated with increased likelihood of health risk behaviors including alcohol, tobacco, and other drug (ATOD) use, violence, and delinquent behaviors. Similarly, research from the University of Washington Social Development Research Group has shown that protective factors exert a positive influence against the negative influence of risk factors. The premise of the risk reduction and protective factor enhancement approach to prevention is that preventing a problem before it occurs requires addressing the factors that predict the problem. Ideally, this strategy entails discovering the causes of the problem behavior and influencing those causes. Many of the survey questions were used to assess students' status on risk and protective factors in the community, school, family, and peer-individual domains. Composite scales were computed for each of these domains for program planning. For more information on risk and protective factors, please see the HYS fact sheet "What Are Risk and Protective Factors?" at: https://www.askhys.net/SurveyResults/FactSheets.

Risk and Protective Factor Graph of All Scale Results

For each risk factor scale, the percentage of students who are at risk (i.e., who agreed with statements that predict ATOD use or other problem behaviors) is reported; higher percentages indicate that more students are likely to engage in problem behaviors. For each protective factor scale, the percentage of students who are resilient (i.e., who agreed with statements that predict the ability to resist ATOD use or other problem behaviors) is reported; higher percentages indicate that fewer students are likely to engage in problem behaviors. These percentages are based on computational methods provided by the University of Washington's Social Development Research Group.

Questions by Topics

Questions about a single topic are not always grouped together in this report. For example, some questions about alcohol are presented in the Alcohol, Tobacco, and Other Drug (ATOD) Use section and others are presented in the Risk and Protective Factor section. The following list, groups the questions by topic so you can easily locate them in this report.

- Abuse 130-135
- Activities and Clubs 96, 200-202
- Adverse Childhood Experiences Scale (WAH-ACEs) 180
- Alcohol

Access 62, 185

Age at first use 247

Current use 41, 59-60, 76

Drinking and driving 116-119, 123

Family influence 63-64, 210-211, 220

Lifetime use 29

Perceived norms 65-66, 69, 191, 193, 248, 253

Perceived risks 67, 244

Prevention/intervention 77, 169

Use at school 74-75

Usual type 61

- Asthma 98-99
- Bullying/Harassment 159-168
- COVID-19 152-157
- Children's Hope Scale 175-179
- Demographics 1-25
- Disability 14-16
- Disordered Eating and Weight Stigma 104-105
- Family

Food insecurity 85

Living situations 18-20, 84

Management and involvement 206-219

Migrant or seasonal work 23

Military service 22

Mother's education 17

- Fighting 127
- Fitness

Physical activity 90-93

Sedentary behavior 94

- Gambling 158
- Gangs 128-129
- HIV/STD/Pregnancy Prevention 110, 172-174
- Health or Health Care

Doctor visit 97

Oral Health 100-102

Sleep 103

- Honesty 26
- Marijuana

Access 70, 187

Age at first use 245

Current use 42, 69, 76

Family influence 71-72, 222

Lifetime use 30

Perceived norms 73, 190, 195, 250, 254

Perceived risks 242-243

Use at school 75

Using and driving 120-123

Usual type 68

Mental Health

Anxiety and worry 144-145

Depression 138

Help with mental health 146-148

Internet/social media 149-151

Suicide 139-143

- Neighborhood and Community 196-199, 203-205
- Nutrition

Age at first use 54, 246

Current use 34-40, 50

Family 221

Lifetime use 27-28

Perceived norms 52, 192, 249, 252

Perceived risks 58, 241

Prevention/intervention 169

Quitting 53 Secondhand smoke 51

Use at school 75

- Usual type 55-56
- Weapons 126, 189, 194, 212

Core Questions

"Core" questions asked of all secondary students are listed below. All other questions on the Secondary survey are only asked of about half the students. All Elementary students received the same survey which had some of the core questions from the Secondary survey.

Activities

Participation in after school activities 96

Alcohol

Age when first drank alcohol 247

Binge drinking 59

Current alcohol drinking (past 30 days) 41

Levels of alcohol use 60 Lifetime drinking 29

• Bullying

Been bullied (past 30 days) 159

Demographics

Age 2-3

Disability 14-16

Education level of mother 17

Food insecurity 85

Gender identity 5-7

Language spoken in home 13

Loss of home due to family finances 20

Migratory family 23

Race/Ethnicity 10-12

Sex at birth 4

Sexual orientation 8-9

Survey location 1

Where you live 19

Who you live with 18

• Driving Under Influence

Driving after using alcohol 119

Driving after using alcohol and marijuana 123

Driving after using marijuana 122

Fighting

Physical fighting (past 12 months) 127

Gangs

Gang involvement 128

Gangs at school 129

• Hope

Can get things important in life 176

Can solve problems 178

Children's Hope Scale 176

Doing as well as other kids 177

Past will help in future 179

Marijuana

Age when first used marijuana 246

Current marijuana use (past 30 days) 42

Lifetime mariuana use 30

Mental Health

Bothered by anxiety 144

Bothered by worrying 145

Depression (past 12 months) 138

Seriously considered attempting suicide 139

• Other Drugs

Current painkiller use (past 30 days) 45

School Climate

Absent from school 25

Been bullied (past 30 days) 159

Changed schools in last year 24

Enjoyed being in school (past 12 months) 228

Feel safe at school 239

Grades in school (past 12 months) 223

Participation in after school activities 96

Substance use on school property 75

Weapon carrying on school property (past 12 months) 126

Texting and Driving

Texting and driving (past 30 days) 125

Tobacco

Age when first smoked a cigarette 245

Agen when first used an electronic cigarette 54

Current cigarette smoking (past 30 days) 34

Current electronic cigarette smoking (past 30 days) 37

Lifetime cigarette smoking 27

Lifetime electronic cigarette use 28

Vapor products used 55

Weapons

Weapon carrying on school property (past 12 months) 126

For more information on which survey forms each question was on, see the Survey Crosswalk at www.AskHYS.net, under HYS Results - QxQ
