

## Five-in-a-Row

**Materials:** Gameboard, counters (about 20), two number cubes ~~or~~ or number cards 1 – 6.

**Players:** 2-5

**Object:** Cover five squares in a row horizontally, vertically or diagonally

### How to Play:

1. Each person has a separate game board.
2. Roll the number cubes (or turn up two Number Cards)
3. Find the sum of the rolls. Look at the board for a square that matches the sum. Place a counter on that square.
4. Continue in this way until you have covered five squares in a row. If no move can be made because that sum is already covered, roll again.

### Variations:

1. Have them record the sums each time:  $5 + 2 = 7$
2. After recording all their sums, total how much the sums total. Whoever has the highest/lowest sum of sums wins.
3. Roll three cubes and decide which two numbers to add together.
4. Create other game boards with higher numbers and use three cubes and total all three.

# Five in a Row

12	11	10	9	8
7	7	6	5	4
2	2	3	4	5
5	6	6	7	7
8	9	10	11	12

## Five in a Row

2	3	4	5	6
6	7	7	8	9
10	11	12	11	10
9	8	7	7	6
6	5	4	3	2

## Five in a Row

2	2	3	3	4
4	5	5	6	6
6	7	7	7	7
8	8	9	9	10
10	11	11	12	12
