

FAMILY ACCESS - YOUR ONLINE CONNECTION TO SCHOOL!

We encourage all families to sign up for FAMILY ACCESS, our online student information system. Once you have a username and password, you can access the system at any time. You sign up only one time for your family. As any younger students enroll, they will be added to your account automatically.

How will you use FAMILY ACCESS?

1. To view and verify information about your student:

- Contact information*
- Attendance records
- Lunch account purchases and balance
- Track student progress! This most popular feature allows middle school and high school students and families to see grades and assignments on a regular basis.
- Report cards
- Health records*

*To update contact information or health records, call your student's school.

2. To add money to your student's lunch account.

3. To change how our phone messaging and email system contacts you, by going to the "Skylert" tab. For example, do you want emergency calls to go to one phone # and general messages to another?

How can you sign up for FAMILY ACCESS? It's easy. Fill out and send the form below to your child's school or email the information to your FAMILY ACCESS contact. (See reverse side for list of contacts.) Your username and password will be emailed or sent to you.
