# For Children's Sake, for School Buses!

Brought to you by
School Bus Drivers of Arizona

All too often, school bus drivers report seeing other motorists ignore and drive past their stop arm and red lights, putting your children at risk for being injured. Remember, when you see the flashing yellow lights on a school bus, slow down, and when you see the flashing red lights and stop arm deployed, come to a complete stop.

Only motorists driving in the opposite direction with a physical barrier, such as a curbed median separating the other side of the road, do not have to stop.

## Help keep children safe, Arizona!
