

May 28, 2024

Dear families and staff of Parkway School:

We would like to provide you all an update on the progress of our water filtration system.

While we were hopeful to be on target for a springtime completion, there has been a delay delivering the tanks for the filtration system from our vendor after damages occurred during the initial delivery of parts that will be housed in the new completed building.

At this point, we are not certain that the new system will be up and running before the end of the school year, but remain hopeful.

We will continue our regular updates. Thank you for your continued cooperation and support.

Dr. Toni Jones  
Superintendent of Schools
