

The Remind plan for schools and districts

Reach your entire community on one platform

The Remind plan helps you enable **meaningful engagement** across your entire organization—with the same tool that teachers, students, and parents are already using to communicate.

Two-way messaging on any device

Mobile-first messaging helps bridge the gap between school and home. Remind lets educators, students, and families **reach each other by text or app**—without showing personal contact information.

99% of text messages are opened, compared to 22% of emails

96% of Americans own a cell phone of some kind

SOURCES: PEW RESEARCH CENTER, TATANGO, MAILCHIMP

Communication beyond the classroom

Channel existing engagement for administrator messaging, from organization-wide announcements to attendance notifications.

“Remind allows teachers, support staff, and site administration to communicate with parents efficiently and effectively.”

RHONDA SIQUEIROS

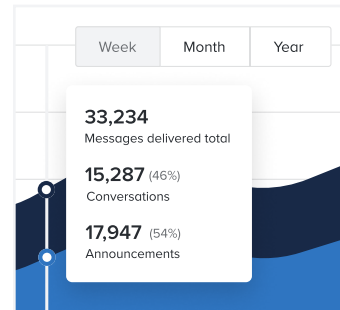

District Instructional Specialist, Sanger Unified School District

The Remind plan includes features to help you:
