

Original Student Compositions

Kert, Erik, and Nicholas were asked to create a piece of music based off of a piece of media. The students composed the music and edited the media together on their own!

Ecce Aurora

Kert Roberts

When creating this piece I asked myself "imagine if there were sounds to the Northern Lights?". Not many people have the opportunity to see them live, but tonight you do - and this is what I imagine they would sound like.

- Note from Kert Roberts -

Brass Concert

Erik Serrato

Cool Guys

This piece is about the emotions we experience in times of change and excitement. I drew inspiration from various films that I thought conveyed these emotions clearly. I wanted to write about powerful feelings going into a hopeful mindset for the future.

-Note from Erik Serrato-

Caverns

Nicholas Sanford

I knew I wanted to make a piece inspired by the game Geometry Dash, but at first I didn't have any ideas. Then I started experimenting with things that sounded good together and the name came to me while creating it.

- Note from Nicholas Sanford -
