The Legacy Campus connects passions to pathways through a Career and Technical Education (CTE) environment. Post-secondary and industry partnerships provide relevant learning opportunities for high school students to ensure a competitive advantage and workforce readiness. Courses offered for the 2023-2024 school year include robotics, aviation, culinary, nursing, and much more. Students from across the district can enroll in courses at the Legacy Campus while still attending their regular high school.

The goal at the VALE Campus is to unite passion with purpose as students uncover learning to solve relevant and meaningful challenges. Staff believe in redefining alternative education to equip students with the necessary skills and tools to succeed in a rapidly evolving world. This innovative approach to education is centered on unleashing the potential of every student by providing a non-traditional educational approach, meaningful learning experiences, and problem-based learning opportunities that transcend traditional content areas.
