

Foundations of Algebra II Summer Assignment 2024

These are the directions for your summer assignment for next year's course. This is an opportunity for you to review selected topics from Algebra I to make sure you are ready for the new material in Foundations of Algebra 2.

Your summer assignment:

1. Use the link <https://www.deltamath.com/students?code=6WP5-2YT6> to join my Foundations of Algebra 2 2024-25 class. Complete each of the standards there and watch the example videos as needed.
 - Your summer assignment will be worth **five** homework checks and will be collected the first day of class.
 - On the third day of school, you will have a test on the summer assignment material. Keep in mind - Two class days are not enough to re-teach the entire information on the packet. It is your responsibility to return to school with questions about challenging problems from the packet.

For the first day of class:

- ✓ Have your summer assignment done.
- ✓ Solely for Foundations of Algebra II, have a binder ready with dividers, white lined paper and graph paper. It is recommended that you have at least a 2" binder.
- ✓ Bring your graphing calculator. We recommend the TI -84, TI-83 Plus or TI-83.
- ✓ Bring your pencils (not pen!) and a ruler.

This will help us get off to a great start and lead us to an enjoyable and rewarding school year!

Ms. Soundararajan (Ms. S)
