June 1, 2024

Dear Student/Parent/Guardian:

Welcome to your Summer Mathematics Review Packet, which is **required** for Integrated Math 1 Honors. **You must complete this packet whether you are a student from an Accelerated or Standard 8th-grade class.**

To help students meet with success in Integrated Math I Honors, students are provided with this set of math problems studied in middle school. In today's environment of rigorous academic standards with the newly implemented Common Core, students need to understand core topics to progress in their mathematical learning. This **REQUIRED** packet is intended to help students retain some basic skills they have learned as well as help them gain some new skills; it is designed to help students transition to High School Mathematics.

Students, please note that all honors classes are fast-paced and not only cover more concepts but also cover concepts in greater depth than their College Prep (CP) counterparts. You will need to spend some time this summer preparing for the class. It is important to remember that maintaining academic integrity is incredibly important to your overall success in the course and life. You need to LEARN the material in this packet by watching the linked videos and completing the following practice problems. You are also expected to show your hand-written work completely in the space provided (or attach extra paper when needed). **Just providing answers is not sufficient.** You are expected to complete this packet FULLY by the first day of school, and **you will turn in your work on paper to your Integrated Math Honors teacher during the 1st week of school.** DO NOT USE PHOTOMATH OR SIMILAR APPS to complete this, as it will not prepare you conceptually and mentally for an honors-level math class. If you do not understand any portion of the packet, please do not use any other means; plan to stay after school during the first two weeks with your teacher to learn and review.

Good luck as you transition to high school. We look forward to seeing you at MHS.

Sincerely,

*Faiza Khan*

Director of Mathematics K - 12

Revised 5/2/2024 - An electronic version of this packet is available on the Medford Public Schools website\*

## Part 1: Solving Equations in One Variable

### Videos to watch:

<https://www.youtube.com/watch?v=6EE7Zygtsw> (Two-Step Rational Equations)

<https://youtu.be/hQ4RMKKI3lg> (Multiple Step Equations)

Problems to complete. Justify your answer.

| #1-6. Solve for the unknown variable.   |                                     |
|---|-------------------------------------|
| 1. $5 = 7w + 8w + 2$  | 2. $-21a + 28a - 6 = -10.2$         |
| 3. $2k - 3(2k - 3) = 45$  | 4. $68 = \frac{1}{5}(20x + 50) + 2$ |
| 5. $\frac{1}{5}x - 14 = 1$  | 6. $\frac{1}{4}(8b - 80) + b = 70$  |
| 7. A coupon subtracts \$17.95 from the price $p$ of a pair of headphones. After using the coupon, you pay \$71.80 for the headphones. Write and solve an equation to find the original price of the headphones. |                                     |

8. After a party, you have  $\frac{2}{5}$  of the brownies you made left over. There are 16 brownies left. How many brownies did you make for the party? Justify.

9. Jose and Colt are fighting over who gets the biggest solution. Who has the biggest solution? Show support work.

JOSE

$$5x - 3.5 = 12.5$$

COLT

$$\frac{x}{5} + 3 = 12$$

10. The perimeter of the Norwegian flag is 190 inches. What are the dimensions of the flag? Write and solve an equation to answer the question.

11. It takes a plane 4 hours and 15 minutes to fly from Orlando, Florida, to Boston, Massachusetts. The distance between the two cities is 1114 miles.
- a. What is the average speed of the plane **in miles per hour**? Justify your answer.
- b. One mile is approximately 1.6 kilometers. What is the speed of the airplane **in kilometers per hour**? Show support work.

## Part 2: Solving Equations with Variables on Both Sides

### Videos to watch:

<https://www.youtube.com/watch?v=Oxe4T9xR-mI> (Variables on Both Sides)

<https://youtu.be/vCiq-qaZJjI> (Variables on Both Sides with Rational Numbers)

### Problems to complete. Justify your answer.

12.  $-5x - 16 = 9x + x - 1$

13.  $\frac{3}{4}x - 7 = \frac{1}{4}x + 8$

14. 11 less than three times a number is the same as 75 less than the product of -1 and the number. Write an equation and find the value of the number.

15. Graham is hiking at an altitude of 14,040 feet and is descending 50 feet each minute. Max is hiking at an altitude of 12,500 feet and is ascending 20 feet each minute. How many minutes will it take Graham and Max to meet at the same altitude?

16.  $4(6x - 10) = -8(-3x + 5)$

17.  $\frac{3}{4}(48 - 16x) = 4(4 + 2x)$

18. Jaycie has a VIP membership to a movie theater, so she pays \$27 a year and \$6.00 for each movie she sees. Claire doesn't have a membership, so she pays \$8.25 each movie she sees. How many movies would they have to see in a year in order to pay the same amount that year? Justify your answer.

### Part 3: Solving for Angle Measures of the Polygon

#### Videos to watch:

<https://youtu.be/F-2eqNeoRJo>

#### Problems to complete. Justify your answer.

The sum of the angle measures of a polygon follows the general rule of  $(n - 2) \cdot 180^\circ$ , where the variable  $n$  represents the number of sides.

19. What is the sum of the measure of interior angles of a pentagon?

20. What is the measure of each interior angle of a regular 20-gon?

21. The sum of the interior angles of a polygon is  $1620^\circ$ . How many sides does the polygon have?

22. Write and solve an equation to find the value of  $x$ .

23. Write and solve an equation to find the value of  $x$ .

24. Write and solve an equation to find the value of  $x$ . Then, find  $m \angle B$ .

25. One angle of a triangle has a measure of  $66^\circ$ . The measure of the third angle is  $57^\circ$  more than  $\frac{1}{2}$  the measure of the second angle. The sum of the angle measures of a triangle is  $180^\circ$ . What is the measure of the second angle? What is the measure of the third angle? Justify your answers.

## Part 4: Properties of Equality

### Videos to watch:

[https://youtu.be/lqXRTV\\_wHRk](https://youtu.be/lqXRTV_wHRk)

<https://youtu.be/xQ9zfm4ecM>

### Problems to complete.

| <b>#26-34. Write the letter of the property of equality that justifies each statement.</b>   |                |  |
|--|----------------|--|
| 26. If $a = 2b$ ,<br>then $a - c = 2b - c$   |                | <b>A.</b> Addition Property of Equality<br><b>B.</b> Subtraction Property of Equality<br><b>C.</b> Multiplication Property of Equality<br><b>D.</b> Division Property of Equality<br><b>E.</b> Distributive Property<br><b>F.</b> Substitution Property<br><b>G.</b> Reflexive Property<br><b>H.</b> Symmetric Property<br><b>I.</b> Transitive Property |
| 27. $8x = 8x$  |                |  |
| 28. $3(p - 7) = 3p - 21$   |                |  |
| 29. If $-7k = -42$ ,<br>then $k = 6$ .   |                |  |
| 30. If $m + n = 15$ and $n = 2$ ,<br>then $m + 2 = 15$   |                |  |
| 31. If $\frac{x}{4} = -5$ , then $x = -20$ .   |                |  |
| 32. If $w^2 = 2x$ and $2x = y$ ,<br>then $w^2 = y$ .   |                |  |
| 33. If $c - 9 = -1$ , then $c = 8$ .   |                |  |
| 34. If $n = -3$ , then $-3 = n$ .  |                |  |
| <b>#35-40. Complete each proof by solving (left column) and stating (right column) the properties of equality. Not all rows may be used.</b> |                |  |
| 35.  |                |  |
| <b>Given:</b> $-8(x - 3) = -32$ ; <b>Prove:</b> $x = 7$  |                |  |
| <b>Statements</b>  | <b>Reasons</b> |  |
|  |                |  |
|  |                |  |
|  |                |  |
|  |                |  |

36.

**Given:**  $-16 = \frac{m}{5} - 18$ ; **Prove:**  $m = 10$

| Statements | Reasons |
|------------|---------|
|            |         |
|            |         |
|            |         |
|            |         |

37.

**Given:**  $\frac{2y-1}{-3} = -5$ ; **Prove:**  $y = 8$

| Statements | Reasons |
|------------|---------|
|            |         |
|            |         |
|            |         |
|            |         |

38.

**Given:**  $5n - 42 = 12n$ ; **Prove:**  $n = -6$

| Statements | Reasons |
|------------|---------|
|            |         |
|            |         |
|            |         |
|            |         |

39.

**Given:**  $2x + 30 = -4(5x - 2)$ ; **Prove:**  $x = -1$

| Statements | Reasons |
|------------|---------|
|            |         |
|            |         |
|            |         |
|            |         |
|            |         |

40.

**Given:**  $18x - 2(3x + 1) = 5x - 16$ ; **Prove:**  $x = -2$

| Statements | Reasons |
|------------|---------|
|            |         |
|            |         |
|            |         |
|            |         |
|            |         |
|            |         |
