Clarification on the Library Resources for Park City School District

We would like to address recent headlines suggesting that Park City High School will not have library resources available for students. This is a misunderstanding that requires clarification. While it is true that Park City High School has transitioned away from a traditional library model, our commitment to providing students with comprehensive access to library resources remains steadfast.

Innovative Library Partnerships:

The Park City School District has established a partnership with the Park City Library. As part of this collaboration, each student is issued a free Park City Library Card, ensuring they have access to an extensive collection of books, digital resources, and library services. This initiative aligns with our goal of integrating community resources to enhance student learning experiences.

Streamlined Library Card Distribution:

To make library resources more accessible, we have integrated the library card application process into our student registration system. Students can easily apply for a Park City Library Card online, and the library staff will process these applications efficiently. Students will either pick up their library cards over the summer or receive them at the start of the fall semester.

Community Support and New Spaces:

The new spaces and resources provided by the Park City School District were made possible by the community's support during the 2021 School Bond Campaign. These new facilities will include advanced learning environments that support various educational programs.

We are proud of the innovative steps we are taking to ensure that all Park City School District students have access to the resources they need to succeed. The collaborative efforts between our schools and the Park City Library demonstrate our commitment to providing a modern and effective approach to student learning.
