

STATE AND FEDERAL PROGRAMS ADMINISTRATION

This District operates many specially funded programs which must be administered in accordance with particular federal and/or State laws and conditions of the grants.

The Board of Education, through its approval of such programs and acceptance of funds, is ultimately responsible for them even though many of the regulations which govern them are established by another agency.

The administrators assigned to Board approved federal and State programs are charged with the responsibility of coordinating funded projects, administering grants, and ensuring that the various departments which operate these programs do so within the guidelines pertaining to the particular program.
