

## **CLSD Student Wellness and Success Fund Plan**

Canfield Local School is dedicated to addressing the comprehensive needs of the Whole Child, encompassing physical, social, emotional, and intellectual well-being. Our district is implementing a Multi-Tiered System of Supports (MTSS) with a three-tier instructional model focused on behavioral health through Positive Behavioral Interventions and Supports (PBIS). Our strategic goals emphasize mental health awareness and staff training. Additionally, we provide trauma-informed care for our staff members.

We collaborate with the Eastern Ohio ESC to receive consultation on PBIS, prevention services, and social work support. Through a partnership with Valley Counseling, we offer a licensed counselor available during school hours for students who cannot access private counseling. To support physical health, we allocate funds for school health aides and nursing services. Furthermore, these funds are used to provide school-based counseling for our elementary students.

In 2021, Canfield Local Schools conducted a survey among parents, teachers, and students to assess the school climate. The district plans to readminister this survey to evaluate growth areas, reflect our Student Wellness and PBIS initiatives' success, and identify areas needing improvement.
