Subject: Facility and Attendance Boundary Analysis  
Date: August 17, 2023

### *Recommendation*

Authorize the administration to prepare a design for an addition/renovation for the Mount Nittany Elementary School.

### *Background*

This recommendation was presented at the [July 31, 2023 Board meeting](#) as a culmination of the attendance boundary and facilities assessment focused primarily on the elementary school areas. Crabtree, Rohrbaugh and Associates Architects (CRA) assisted the administration in completed this work.

The enrollment at the Mount Nittany Elementary School has exceeded the building capacity for several years, is not expected to resolve in the near future and is not able to be remedied through attendance boundary modifications without significant disruption. In addition to growth in total student enrollment at Mount Nittany Elementary, the entire district elementary schools has seen increased space need due to adding the fifth special area and support program capacity, i.e. special education, English Language Learners.

### *Process*

CRA has prepared a proposed design schedule for the addition and renovation project as a point of reference in considering this recommendation.
