

June 2024

Dear incoming Third Grade Parents,

All incoming third grade students are assigned summer math work that they bring with them on the first day of school. Below you will find the workbook to be ordered, and the lessons to complete. To order your child's summer math workbook, order at: summerskills.com

We encourage incoming 3rd graders also to **work on their multiplication/division facts over the summer.**

Summer is an opportunity for students to review and reinforce concepts learned during the previous school year. Parent participation to review and check the student's work is encouraged.

Sincerely,

The Third Grade Team

Work is assigned by lessons not by page numbers.

Please order the [2nd Grade Math Review](#) - as your child just completed 2nd grade and the summer homework is a review of 2nd grade.

Lessons to be completed: 1, 4, 8, 11, 14, 17, 20, 23, 27, and 30*

*If students would like additional practice (optional) they are welcome to

complete the remaining lessons in the book.
