

DCTS Summer Camp

July 8-11 at Aston Campus
July 15-18 at Folcroft Campus

This camp is designed to provide students in grades 6-8 opportunities to learn about STEAM through active, project-based learning in multiple Career and Technical program areas. Campers will create STEAM based projects, which will produce a tangible result to keep at the end of each camp day. Campers will rotate through programs listed for each campus during the week. A camper can participate in one week or both weeks of camp. Projects will vary by campus and program but are sure to excite and encourage exploration in Science, Technology, Engineering, Art, and Math.
