

Message from the Superintendent

It is thrilling to share the significant strides we've made in enhancing our school facilities. Our capital bond program, unfolding in three phases, is a testament to our community's dedication to creating environments conducive to the best educational practices.

We are nearing the completion of the first phase, in progress for the second, and eagerly planning the third. This progress reflects our collective effort to transform our schools into spaces that exceed our community's expectations. Each project is undertaken with a keen focus on sustainability and community enhancement, inspiring and welcoming everyone to our neighborhood schools.

My deepest gratitude extends to our community for your unwavering support of public education. Through your partnership, we are shaping a promising future for all our students. I invite you to visit our schools and witness firsthand how your bond investments foster remarkable changes. Together, we are building a brighter future.

Sincerely, Dr. Jennifer Schiele

Citizen Planning and Oversight

Elected School Board provides approval

Bond Accountability Committee provides oversight in planning and progress

Long Range Facility Planning Committee provides strategic inputs for future direction

Excellent fiscal management earns premiums and interest

Executive Director of Project Management leads project managers, coordinators and committees
