

Real Estate Game

For Area

You will need graph paper, two colored pencils, and two dice..

1. Roll two dice and use the numbers as the sides of the area of your land plot.
2. Draw the fence line around your plot. The fence line forms the perimeter of your plot.
3. Write and solve the multiplication problem in your plot.
4. Color in your plot with a colored pencil. You will be coloring in the area of the plot.

This game is played in pairs. When there is no more room to place your next plot of land, the game is over. The player with the most land area is the winner.
