

Updating Chrome OS (Operating System)

Making sure your OS is up to date is important to keep your device running smoothly. You may receive notifications that a new version has been downloaded. If so, you will need to restart your device for the new version to take effect.

1. Log in using your username and student ID.
2. In the lower right hand corner, select the box with time in it. It opens to other options.
Select the gear icon at the top.
3. A new window will open for chromebook options. In the lower left, select About Chrome OS.
4. You will see a button for either Check for Updates or Restart.
 - a. Check will determine if you need an update. If so, it will start downloading.
 - b. A Restart is necessary for the changes to take effect. Your device will restart.
5. You may need to repeat to get to the current OS.
