**Student ID** 1234567890  
**Student Grade** 3

# SAMPLE

**What is i-Ready?** i-Ready is an online learning program focused on reading and math. Student has recently taken an i-Ready assessment at school. This report gives you a snapshot of your child's performance. For more information about i-Ready, visit [i-Ready.com/FamilyCenter](https://www.i-Ready.com/FamilyCenter).

## Student's Overall Math Performance

Domain	Test (09/08/23)
<b>Overall</b>	<b>At Grade 3</b>
Number and Operations	At Grade 3
Algebra and Algebraic Thinking	At Grade 3
Measurement and Data	At Grade 3
Geometry	At Grade 3

## Additional Suggestions

### ✓ Discuss these results with your child

Celebrate their strengths and progress, and collaborate with them on planning how they will reach their goals.

### Reach out to the teacher

Ask your student's teacher for additional insight into Student's progress and for ideas and resources to support your student's learning at home.

## Understanding Key Terms

**Placement Levels** are used to guide instruction in the classroom. Placement levels are based on Student's level of performance overall and on each subtest, and they describe the optimum instruction level.

The four possible placement levels are:

- Needs Improvement
- Approaching Grade Level
- At Grade Level
- Above Grade Level

**Scale Scores** provide a single, consistent way to measure growth across grade levels and domains. You can use a scale score to compare a student's growth on different administrations of the *i-Ready Diagnostic*.

**National Norms** are percentiles that compare each student's performance with that of a nationally representative sample of students in the same grade level who took the test at the same time of year. For example, a student who has a norm of 60% on the test scored better than 60% of a nationally representative group of students who took the test.

## Skill Progress and More Information

Domain	Test (09/08/23)	More Information
Number and Operations	At Grade 3	At placement levels 3-5 this domain addresses four operations with whole numbers with an emphasis on multiplication and division, as well as understanding of and computation with decimals and fractions. Student's score indicates an appropriate understanding of whole number addition and subtraction, basic multiplication and division, and basic fraction concepts. Student may be ready to extend their understanding of fraction concepts.
Algebra and Algebraic Thinking	At Grade 3	At placement levels 3-5 this domain addresses multiplication and division concepts, including remainders, factors and multiples, as well as numeric expressions and patterns. Student's score indicates an appropriate understanding of basic addition, subtraction, and multiplication concepts. Student may be ready to develop an understanding of interpreting remainders and real-world multiplication and division problems.
Measurement and Data	At Grade 3	At placement levels 3-5 this domain addresses the relationship among measurement units, geometric measurement concepts, and presenting and interpreting data on line plots and bar graphs. Student's score indicates an understanding of time, units of weight and capacity, and bar graphs. Test results indicate Student may be ready to develop concepts and skills related to using tools to measure weight and length, solving problems involving money, perimeter, and area, and creating and interpreting line plots.
Geometry	At Grade 3	At placement levels 3-5 this domain addresses angles and perpendicular and parallel lines, classification of two-dimensional figures, line symmetry and plotting points on the coordinate plane. Student's score reflects an ability to identify different quadrilaterals. Student may be ready to learn to classify three-dimensional shapes.
