Update – Fire Truck Access Road

Dear Members of the Blind Brook Community,

This morning I received an update on the projected timeline for the fire truck access road completion at the Bruno M. Ponterio Ridge Street School. Based on a recommendation from our paving contractor there will be additional sub-base material added prior to paving. This will increase the grade around the drainage catch basins in order to prevent the puddling of water in these areas. This will mean that the paving work will be completed on Monday rather than today.

I have our New York State building inspector set up a review of the work next Wednesday. I continue to work towards the full Certificate of Occupancy for the building by the end of September.

Sincerely,

Dr. Colin M. Byrne
Superintendent of Schools
