Fire Truck Access Road

Dear Members of the Blind Brook Community,

As a final step to close out the construction project at the Bruno M. Ponterio Ridge Street School building, a renovation to the black top area behind the building needs to be made to allow fire trucks a greater range of access to the buildings. This will be the final step in getting the permanent Certificate of Occupancy for the building.

The funding for this project is included in the funds previously gathered for the capital project. No additional budgetary funding is needed to complete this work.

Work on this project will begin on Tuesday, August 1st with the majority of work completed before the start of the school year. There will be some work continuing into the school year but everything is expected to be completed before the end of September. The main areas of impact will be recess and dismissal so we expect no disruption of instruction during this time. Ms. Taylor and Ms. Letizia are working on plans to handle this for the time needed. Information about recess and dismissal will be shared with parents as soon as it is available.

I will continue to keep the community informed about the progress of the work as well as when the final Certificate of Occupancy is received.

Sincerely,

Dr. Colin M. Byrne
Superintendent of Schools
