

Bergenfield High School
Bergenfield, New Jersey

Mathematics Department

Summer Course Work

in preparation for

AP Precalculus

Completion of this summer work
is required on the first day of the
2024 – 2025 school year.

Name _____

Bergenfield Public Schools
Mathematics Department
80 South Prospect Avenue
Bergenfield, New Jersey
(201) 387-3850

June 2024

Dear Parents and Guardians:

We are excited again to present summer activities that the math teachers of Bergenfield High School have created. Enclosed are math activities designed to help your son or daughter practice the skills which they have already learned and are critical to success in this course. As you may be aware, studies have shown that students who do not practice or review during the summer months the material they have already mastered lose some of that mastery. Unfortunately, this then requires the next teacher to spend valuable teaching time reviewing. While certainly not the final answer, this packet of activities is designed to help your son or daughter retain his or her math skills and knowledge.

Like you, we want your child to enjoy a wonderful summer. That is why we have designed activities so that 20 to 30 minutes of work per week should be all that is required. We urge you to encourage your child to take this task seriously and complete it successfully. Together we can make a difference in your child's future. Now is the time to build on the foundation to help your child succeed on future standardized exams, placement tests, and even more importantly, assessments at a college level.

These activities will reinforce skills that were taught in previous courses. **This assignment should be completed and brought to the first day of the school in September.** Calculators are NOT to be used to complete this project except where noted. *Please read all directions carefully.*

We wish you a wonderful and safe summer.

Sincerely,

Jim Fasano
Principal

Steven Neff
Director of Mathematics K - 12

AP Precalculus
Prerequisites Review #1 – Algebraic Manipulation of Linear Functions

1. A line passes through (7,4) and (3,-4). Find an equation for the line in all three forms for linear equations.

Slope-intercept Form	Point-slope Form	Standard Form

2. Sketch the graph of each line.

a. $y = \frac{2}{3}x - 2$	b. $y = -3x + 1$

3. Sketch the graph of each line.

a. $2x - 5y = 10$	b. $-4x + 3y = -24$

4. A recording studio charges a base fee for use of their facility plus a constant fee per hour of use. The table compares the number of hours the studio is used with the total cost, c , for use of the studio. Use the table to answer each of the questions below.

Hours of studio use (h)	2	4	6	8
Total cost to use the studio(C)	\$450	\$600	\$750	\$900

<p>a. What is the fee charged per hour for use of the studio?</p>	<p>b. What is the base fee for rental of the studio?</p>

<p>c. Write a linear equation to model this situation.</p>	<p>d. Identify the domain and range for this function.</p>

5. Jaden competes in a race, running at a constant pace from start to finish. The distance remaining in the race (in miles) as a function of time (in minutes) is shown in the graph. Use the graph to answer the following questions.

a. How long did it take Jaden to reach the finish line? Explain.	b. How long (distance) was the race? Explain your reasoning.

c. Write a linear equation to model this situation.	d. Identify the domain and range for this function.

AP Precalculus

Prerequisites Review #2 – Linear Functions: Solving Equations and Inequalities

1. Solve $4x - 9 < 7x + 15$

2. Solve $6(3x - 2) = -4(2x - 9)$

3. Solve $\frac{2}{3}x + 4 = \frac{4}{5}x - 3$

AP Precalculus
Prerequisites Review #3 – Polynomial Addition and Multiplication

1. Simplify the expression to a polynomial in standard form: $(4x^3 - 5x^2 - 3x + 7)(2x - 5)$.

2. Simplify the expression to a polynomial in standard form: $3(2x - 5)(x^2 - 4x + 2)$.

3. Simplify the expression to a polynomial in standard form: $(3x - 1)(-2x^2 + 4x - 7)$.

AP Precalculus
Prerequisites Review #4 – Factoring Quadratic Trinomials

Factor each quadratic trinomial.

1. $x^2 + 10x + 9$	2. $x^2 - 6x + 9$
3. $x^2 - 11x + 24$	4. $3x^2 - 5x - 12$
5. $4x^2 + 28x + 49$	6. $15x^2 - 11x - 12$

AP Precalculus

Prerequisites Review #5 – Solving Quadratic Equations and Inequalities

Solve each problem by factoring or using the quadratic formula. Round answers to the nearest hundredth as needed.

1. $x^2 + 4x + 3 = 0$	2. $x^2 - 5x = 6$
3. $3x^2 - 5x - 9 = x^2 + 3$	4. $4x^2 - 12x + 1 < 0$

5. $2x^2 + 8x = -7$

6. A ball is catapulted upward from the top of a building at a speed of 30 feet per second. The ball's height above the ground can be modeled as $H(t) = -16t^2 + 30t + 40$. How long does it take for the ball to reach a height of 50 feet?

AP Precalculus

Prerequisites Review #6 – Quadratic Functions: Algebraic Manipulation

1. A ball is launched straight up with a velocity of 40 feet per second. The ball's height above the ground can be modeled by $H(t) = -16t^2 + 40t + 5$. Use this information to answer the following questions.

<p>a. How high is the ball when it is released? Explain your answer.</p>	<p>b. How long does it take the ball to reach its maximum height? Explain your answer.</p>
<p>c. What is the maximum height the ball reaches? Explain your answer.</p>	<p>d. How long is the ball in the air? Explain your answer.</p>

2. A child uses 36 legos to build the rectangular frame for the base of her lego castle. Write a quadratic function to model this situation and determine the length of the side of the castle and the largest possible area covered by the castle's base.

3. Does the table of values below represent a quadratic equation? Justify your decision.

x	f(x)
-1	4
0	6
1	11
2	19
3	32

1. Use the diagram to identify each ratio.

a. $\sin F^\circ =$	b. $\sin D^\circ =$
c. $\cos F^\circ =$	d. $\cos D^\circ =$
e. $\tan F^\circ =$	f. $\tan D^\circ =$

2. Using the diagram from #1 above, calculate the measure in degrees of $\angle F$.

3. When a ladder leans against a wall, it reaches a height of 15 feet. The angle of incline is 60° . How far away from the wall is the base of the ladder?

3. A kite is flying extended on 100 feet of string and is 30 feet high. What is the angle of elevation of the kite?

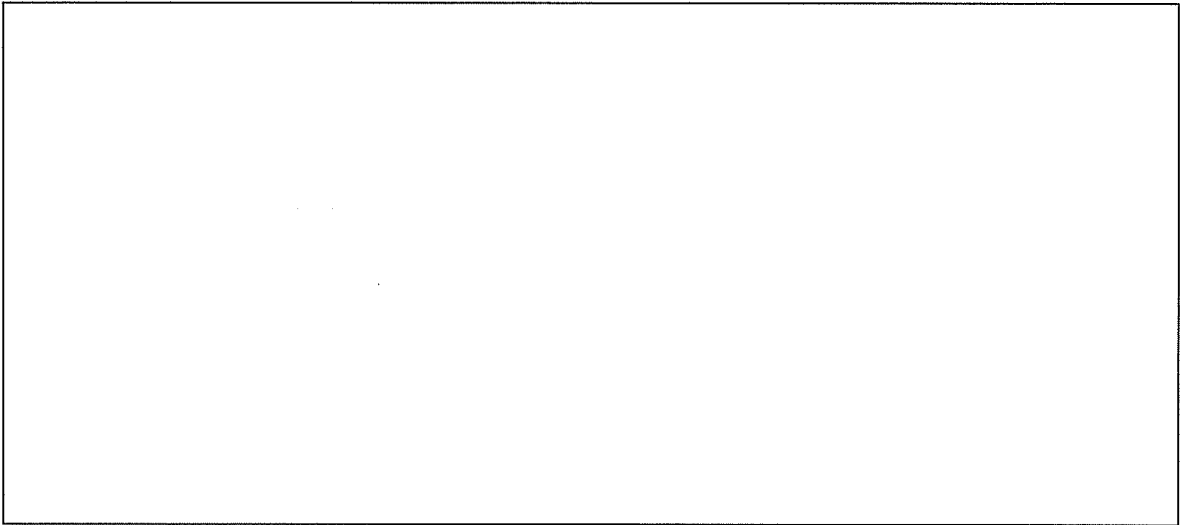

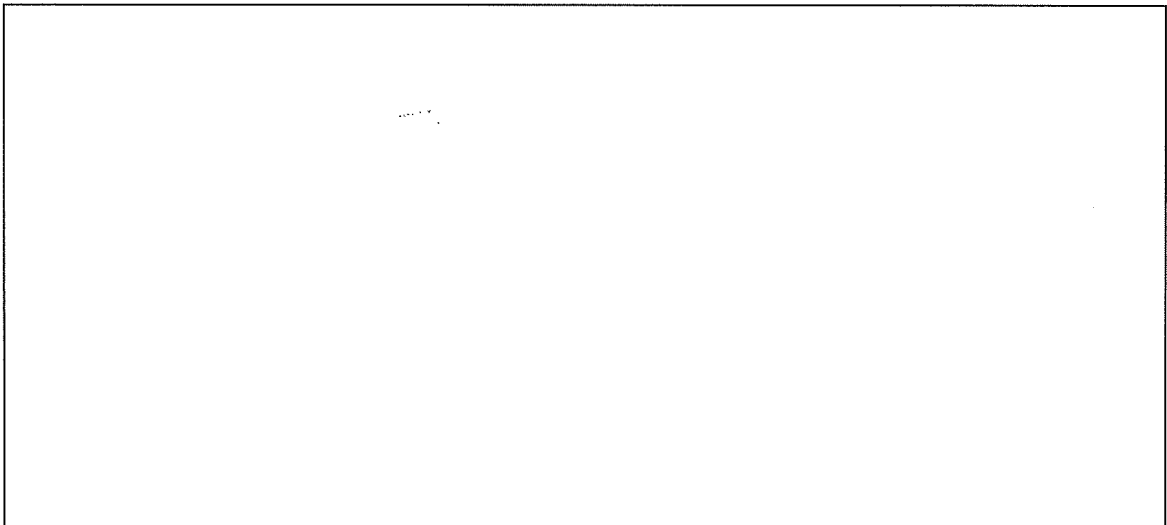

AP Precalculus

Prerequisites Review #8 – Solving Systems of Equations in 2 and 3 Variables

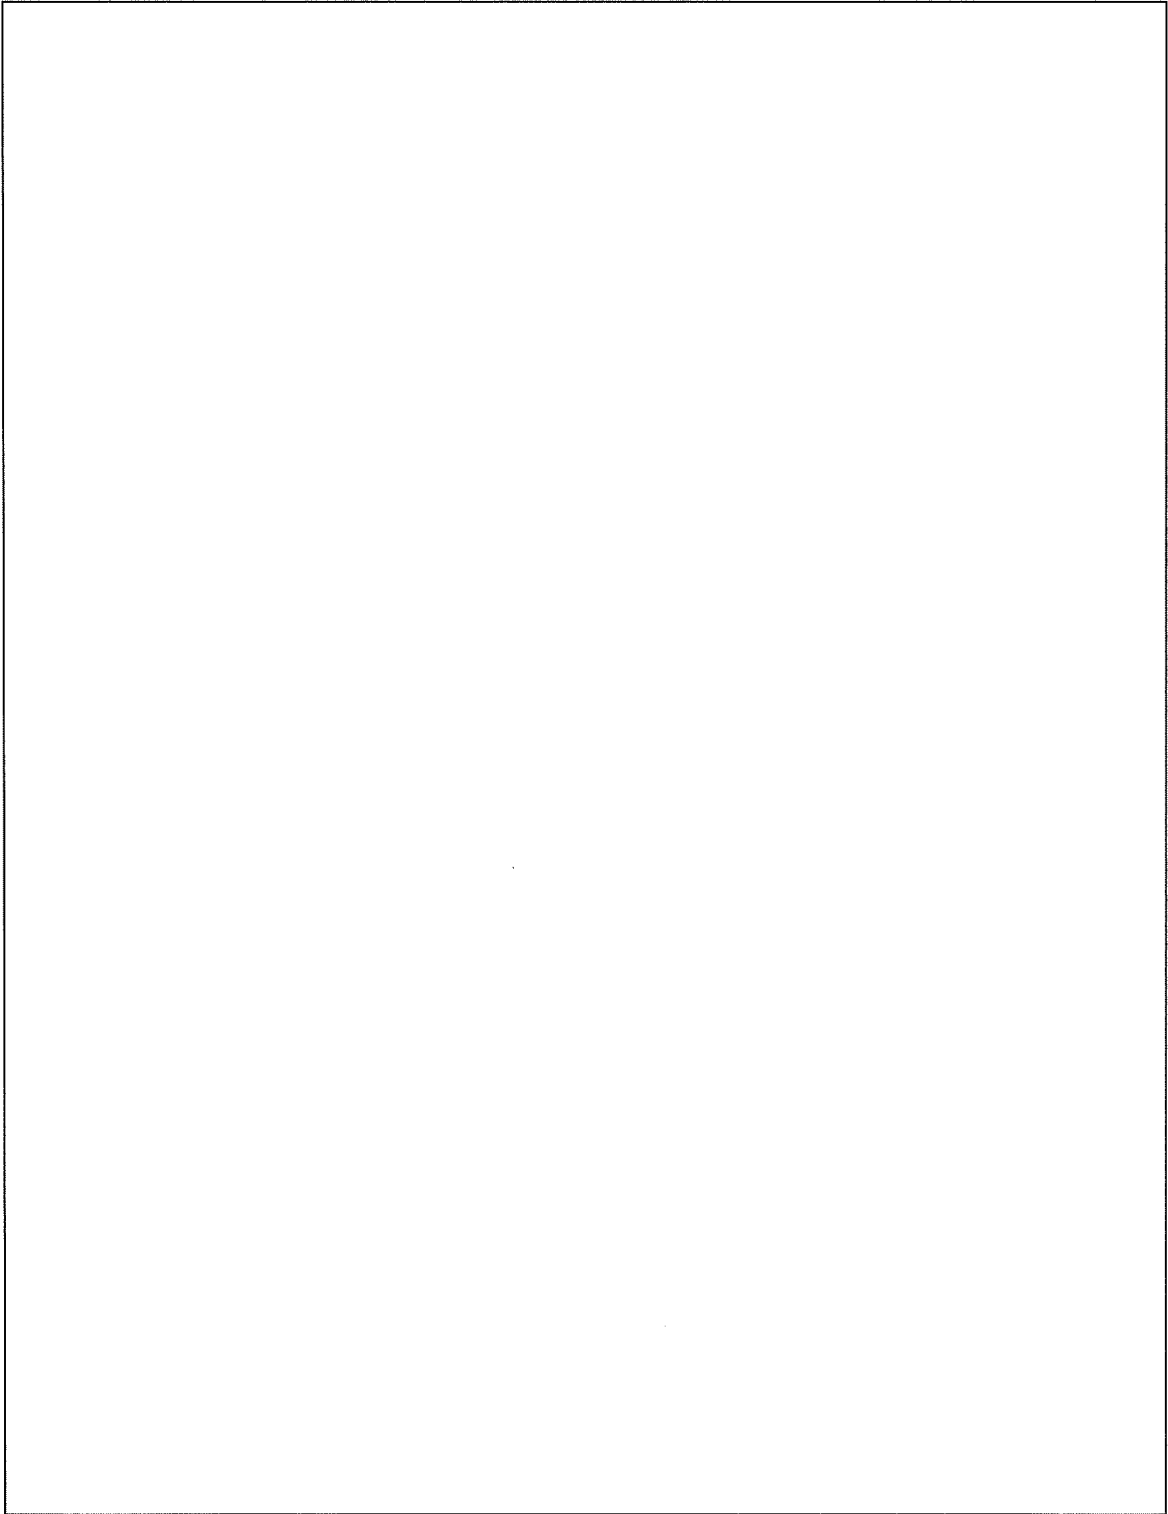

1. Solve $\begin{cases} x + 2y = 10 \\ y = 2x - 5 \end{cases}$

2. Solve $\begin{cases} 5x + 7y = 6 \\ 10x - 3y = 46 \end{cases}$

3. Solve $\begin{cases} 3x + y - 2z = -12 \\ 2x + 2y - 3z = -12 \\ 5x + 3y + 2z = 4 \end{cases}$

4. Solve $\begin{cases} y = x^2 + 4x - 2 \\ y = 3x + 5 \end{cases}$

1. An electrician charges \$250 for the first hour of work and \$75 for each additional hour.

a. Generate the piecewise function to define the cost of hiring this electrician.

b. Graph the piecewise function that would illustrate this situation.

2. Find each of the following values given that $f(x) = \begin{cases} x^3 - 4 & \text{when } x < -6 \\ 2x + 7 & \text{when } -6 \leq x < 1 \\ \frac{x}{x^2+2} & \text{when } x \geq 1 \end{cases}$

a. $f(-6)$	b. $f(1)$	c. $f(6)$	d. $f(0)$
------------	-----------	-----------	-----------

3. Rewrite the function $g(x) = |3x| + 2$ as a piecewise function.

--

AP Precalculus
Prerequisites Review #10 – Exponential Functions

1. A certain bacteria population sample contains 500 bacteria and is known to grow by 20% every hour when left untreated.

a. Write an equation to model the untreated bacteria population (y) after x hours.

b. How many bacteria are in the sample after 5 hours? 7.5 hours?

AP Precalculus
Prerequisites Review #11 – Rules for Exponents

Simplify the following expressions. Write your answers with positive exponents only.

1. $(w^0x^5)^{-1}$	2. $c^{-3}(c^7)^4$
3. $(u^3v^5)^2(u^{-7}v^{-10})$	4. $\frac{x^3y^4}{w^7z^{-2}} * \frac{w^4y^{-3}}{x^5z^2}$

AP Precalculus
Prerequisites Review #12 – Radicals (square roots and cube roots)

1. Evaluate each of the following. Round to the nearest hundredth as needed.

a. $\sqrt{121}$	b. $\sqrt{175}$
c. $\sqrt[3]{125}$	d. $\sqrt[3]{8}$
e. $\sqrt[3]{36}$	

2. Solve for c.

3. Simplify each of the following expressions. Rationalize denominators as needed.

a. $\sqrt{50}$	b. $\frac{3\sqrt{6}}{4\sqrt{5}}$
c. $\sqrt{72a^5b^6}$	d. $3\sqrt{5} + 6\sqrt{20}$
e. $\frac{\sqrt{200x^{17}y^6}}{\sqrt{45x^{15}y^9}}$	

AP Precalculus
Prerequisites Review #13 – Complex Numbers

Simplify the following expressions and rationalize denominators as needed.

1. $(3 + 7i) + (4 - 9i)$	2. $(3 + 7i) - (4 - 9i)$
3. $(3 + 7i)(4 - 9i)$	4. $\frac{10-2i}{3+4i}$
