June, 2024

Dear Parents and Guardians,

We are excited to again present summer activities that the math teachers of Roy W. Brown Middle School have created. Enclosed are math activities designed to help your child to practice the skills which they have already learned and are critical to success in Algebra 1. As you may be aware, studies have shown that students who do not practice or review during the summer months the material they have already mastered lose some of that mastery. Unfortunately, this then requires the next teacher to spend valuable teaching time reviewing. While certainly not the final answer, this packet of activities is designed to help your son or daughter retain his or her math skills and knowledge.

Like you, we want your child to enjoy a wonderful summer. That is why we have designed activities so that 20 to 30 minutes of work per week should be all that is required. We urge you to encourage your child to take this task seriously and complete it successfully. Together we can make a difference in your child's future. Now is the time to build on the foundation to help your child succeed on future standardized exams such as the NJSLA and even more importantly, the SAT.

The activities are web-based through a program called website . These activities will reinforce skills that were taught in Pre-Algebra. Each activity will provide immediate feedback and a score. This assignment is mandatory and will be graded.

We wish you a wonderful and safe summer.

Sincerely,
Dominick Rotante
Principal

Steve Neff

Roy W. Brown Middle School
Mathematics Department
Summer Course Work
For all students entering
7th or 8th Algebra

This Summer's Review Math Assignment will be assigned through Khan Academy.

- You will need to join the correct Khan Academy course.
- **YOU MUST USE your Bergenfield school email address.**

Incoming 7th graders taking Algebra 1 for 7th grade, you will join
Summer Work – Algebra 7 2024-2035

Class code: YBTY2VEM

Join by clicking this link: <https://www.khanacademy.org/join/YBTY2VEM>

Incoming 8th graders taking Algebra 1 for 8th grade, you will join

Class code: 3XV9UXGH

Join by clicking this link: <https://www.khanacademy.org/join/3XV9UXGH>

- You will be expected to complete Unit 3: Get ready for linear relationships. While your quizzes will be assigned a grade (by Khan Academy) based on accuracy, we will use those scores only to inform us about where our students' incoming strengths and weaknesses are. Once you complete the assigned "Unit Test", the Khan Academy program makes suggestions of review content you could watch/do to "fill the gaps" if your score was low. So, it will be up to you to supplement your review over the summer to come in best prepared in the fall. If you complete all the assignments, you will earn a completion grade upon our return in the fall.
- We anticipate this taking between 3 and 4 hours.

If you have any questions or issues please contact your teacher.

Incoming 7th graders Ms. Ortega – Cortega@bergenfield.org

Incoming 8th graders Ms. Mackenzie – Nmackenzie@bergenfield.org
