Definitions for the Mobility Rates:

The Student Mobility Rate (unduplicated) “is the proportion of students having moved during the school year. The student mobility rate measures the number of students who have moved (a count of one regardless of the number of times a student moves). The rate includes an unduplicated count of students who transfer into the school or district or out of the school or district during the regular school year.” (4)

The Occurrence Mobility Rate (duplicated) “is the frequency with which student moves occur during the school year. The occurrence mobility rate measures the number of moves made by students (a count equal to the number of times a student has moved). The rate includes a duplicated count of students who transfer into the school or district, out of the school or district, or both into and out of the school or district during the regular school year.” (4)
