

How to Reset Home Router Administrative Password

1. Launch a Web Browser (Internet Explorer, Chrome, Safari) from a computer or wireless device that is connected to your router's network.
2. Type the IP address of your router (<http://192.168.1.1>) into your web browser's address bar. If you don't have the IP address of your router, you can search for it here:
<https://www.techspot.com/guides/287-default-router-ip-addresses>
3. A login window will display.
4. Enter the router username and password (most common username is admin and password is admin. If you do not have the username and password, you can search for it here:
<http://www.routerpasswords.com>
5. The BASIC Home page of your router will display.
6. **Depending on the model of your router** : Select ADVANCE > ADMINISTRATION and there should be an option to SET PASSWORD.
7. Once the password has been change, Click the Apply button. Your settings are now saved.

Security is everyone's responsibility.
