

# Guy Talk

## SCENARIO

You have reached the age of puberty; the time when your body becomes more like that of a man. Our bodies are always changing, but never more than between the ages of ten and seventeen. This time of transition can be very traumatic.

It's a time when you grow taller and your voice changes. As your voice box expands the sounds you make may squeak and crackle as they get deeper.

Hair begins to grow on your body in places that have always been smooth; you think about shaving.

## IN YOUR OWN WORDS

The part of growing up I like is
