

## Students

**SUBJECT: RESIDENT STUDENTS TRANSFERRING WITHIN DISTRICT**

Resident students who attend a certain District public elementary or secondary school, and who subsequently move to another part of the School District during the same school year, may continue in that school for the remainder of the school year only if the parents or guardians assume responsibility for transportation acceptable to the School District. Otherwise the student will be immediately transferred to the school appropriate to the family's new location in the District.

Resident students who are regularly assigned to a certain elementary or secondary school may attend another district school only when a joint recommendation is written by both involved Building Principals and approved by the Superintendent of Schools.
