

June 13, 2024

Dear families and staff of Parkway School:

We are pleased to share with the Parkway community that the [infrastructure for the water filtration system](#) is now fully constructed. The last step in the process is now getting final approval by the Connecticut Department of Public Health and the Town of Greenwich's Health Department.

Water fountains and regular water access will be returning in the fall for the beginning of the 2024-2025 school year. We are grateful to our facilities team who took this project head-on, while ensuring that bottled water and other supports had been in place all year.

Thank you for your patience and cooperation. Have a wonderful summer!

Dr. Toni Jones
Superintendent of Schools
