

# LEADING LEARNING IN AN AGE OF ARTIFICIAL INTELLIGENCE

## AT A GLANCE

### A.I. GROWTH

- AI industry value is projected to increase by over 13x over the next 7 years.
- By 2025, as many as 97 million people will work in the AI space.
- 83% of companies claim that AI is a top priority in their business plans.
- AI market size is expected to grow by at least 120% year-over-year.

“Artificial intelligence will reach human levels by around 2029. Follow that out further to, say, 2045, we will have multiplied the intelligence, the human biological machine intelligence of our civilization a billion-fold.”

—Ray Kurzweil

## OVERVIEW

While AI has been around for over 60 years, recent advancements in natural language processing created new opportunities and challenges for educators. The disruption of ChatGPT exploded on the scene in late 2022 and the media attention gave traction to the impact of this technology on schools.

Administrators and educators are grappling with the implications this new technology has on current education systems, including curriculum, instruction, and assessment practices.

This hands-on workshop session for Administrators will provide the groundwork for understanding the current state of AI in education. It will explore innovative ways that schools are utilizing AI in the classroom.

## AI SUMMIT AGENDA

### Part 1

Attendees will first dive into the current Trends and Predictions for AI in Education. This work will be led by A.J. Juliani with guests who will focus on Current Applications of AI in Education.

### Part 2

Administrative Topics in Artificial Intelligence  
Ethics, Bias, and Academic Integrity in the Age of AI  
Generative Work.

### Part 3

We will finish with a deep focus on Implementing AI in the K-12 setting: Challenges and Best Practices. Leaders will get turnkey processes for bringing best practices back to their colleagues and develop multiple trainings to use with staff.

**BONUS:** All attendees will receive on a self-paced online course to accompany the in-person training.
