

AP Computer Science Principles - Summer Assignment 2024-25

Welcome to Computer Science Principles.

The summer assignment is to register at www.codecombat.com and complete the first map.

Start by navigating to codecombat.com and clicking Sign Up in the upper right corner and then selecting "I'm a Student". Class Codes will be given out eventually, but for now click the "Play Now" button.

Next, select Kithgard Dungeon and complete the map (starting with Dungeons of Kithgard). The programming language should default to Python and the format should be Text Code; change it to those if they are something different. After beating the first level, you should be prompted to create an account which will allow you to save your progress (use your Bergenfield email address). If the Google integration doesn't work, manually sign up using your Bergenfield address and creating a password.

CodeCombat will be the primary homework platform for the course. Familiarize yourself with the syntax and email me at wnociti@bergenfield.org if you have any questions or concerns.

Sincerely,

Will Nociti
