What is the purpose of this activity? What is our goal?

What is Visioning?

Visioning is a process by which an individual or a community defines the future it wants. Through public involvement, in-person and online workshops identify the community's purpose, core values and **vision** of the future. This process assesses community options and opportunities on the basis of shared purposes.

What is a charrette?

A **charrette** is an intense period of design or planning activity. The word charrette may refer to any collaborative session in which a group of designers draft a solution to a design problem.

Design Considerations

- Access to Natural Light
- Connection to Outdoor Activities
- Public vs. Private
- Loud vs. Quiet Spaces
- Safety & Security
- Flexibility and Future Adaptability
- Vehicle Access (bus, car, service)
- Critical Adjacency vs. Separation

How will we achieve our goal?

Guided discussion exercises allow participants to communicate what works, what doesn't, what they want, and what to get rid of.
