USER GUIDE FOR SOFTWARE CENTER – SCCM 2016.06

Installing Software from the Software Center

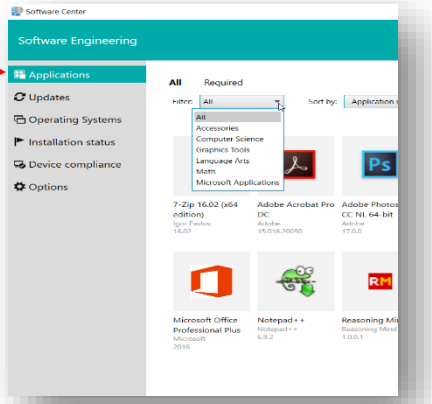

Software Center shows the status of programs assigned to a user or to a computer (DISD Tag). All software that has been assigned to a user or computer will show up in software center. ***All software applications will be installed through DISD Software Center.***

⇒ Click the DISD Software Center Icon on your desktop to access the software center

- *Note: If you see "There is a problem showing current status", simply wait until the Center fully loads or click F5 to refresh the screen.*

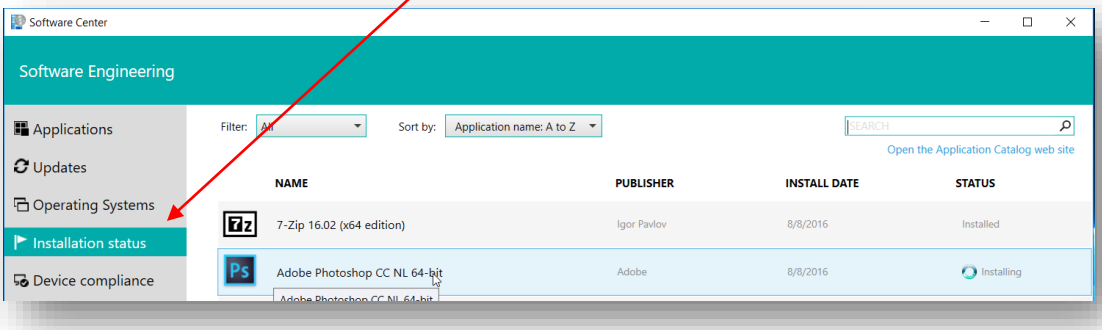

⇒ Click on **Applications**. Choose the program you wish to install. Click **Install**. You may also use the filter to refine the search. **Note:** Only software assigned to individuals will show up in this filter.

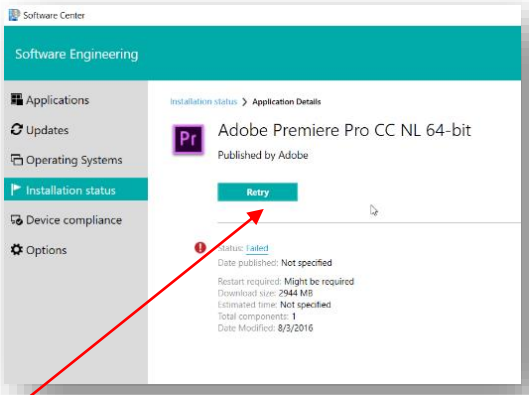

- You will only be able to install one application at a time.

⇒ You can view the success in the **Installation Status** tab of the Software Center.

- All software and applications assigned to both computer and user will appear in this tab when installed

- If a program fails to install or you need to perform the install again, simply select the **Retry** tab. If it fails the second time, please open a ticket with the service desk.

⇒ Go to your start menu to find your newly installed software. Type in the search box or use the alphabetical list to find and run your installed software.
