## The Ins and Outs of 6th Grade

Throughout the year, you will be learning many impressive topics that will take you all over the world.

In ELA (English Language Arts) we will be reading and writing about fiction and non-fiction novels. We will be diving deeper into theme, character traits, and more about the overall writing process.

In social studies we will become world travelers as we study different parts of the globe. Our travels include Asia, Africa, the Middle East, South America, and more!

In math, we will become experts on many different math topics. These include ratios, rates, fractions, decimals, graphing, algebra, and more!

Science class will make us all scientists as we use scientific tools and instruments to study density, matter, cells, geology, the human body, fossils, and more!

In addition to these topics of study, we will also have team-building opportunities and special events built into our year.

All work must have your full name, date, and section on it.

Assignments are expected to be neat and complete.

Teachers are available afterschool for help– so take advantage of this learning opportunity when you need it!

### Homework Policy

Homework is a communication tool between you and your teachers. Homework helps to tell the teachers what you understand, what you don't understand, and where you may be getting confused.

Because it helps to communicate to your teachers, it is very important that homework is completed on time, every time.

# MAGIC

Making A Greater Individual  
Commitment

## Class Expectations

- Work Hard
- Be kind
- No excuses
- Make good choices
